Transformer Features: With a transformer rating of 2000 kVA, the MT-DOE16-MV-3P-13200D-2000KVA-480Y.277-N1 medium voltage transformer is a three phase unit with a primary voltage of 13200 V Delta. It also provides a secondary voltage of 480Y/277 V Delta. Featuring robust construction, this unit's cores are

manufactured with non-aging, cold-rolled silicon steel laminations using state of the art technology.

This unit boasts a low cost of ownership and is highly energy efficient. Lower heat emissions mean less cooling is needed as well. The Standard NEMA Type 1 enclosure makes the unit suitable for indoor applications and it can be floor mounted. The unit also features Class H 180°C insulation with a 150°C temperature rise and is rated IP24.

Benefits: The MT-DOE16-MV-3P-13200D-2000KVA-480Y.277-N1 medium voltage transformer offers many benefits to the consumer. Precision cut aluminum transformer winding material help to improve performance. The close tolerances used during manufacturing also eliminates burrs which hinder performance. Each core is specially coated to prevent the ingress of moisture and are electrically balanced to minimize axial forces during short circuit situations.

This distribution transformer provides owners with significant energy savings as well as offering environmental benefits. Higher efficiency not only extends the life of the transformer, but also turn into cost savings for owners in the form of lower energy bills and decreased cost of ownership. Integrated mounting brackets make installation fast and easy and the offset outward facing installation holes allow for easy power tool access.

Safety: The MT-DOE16-MV-3P-13200D-2000KVA-480Y.277-N1 is a distribution transformer which means that it provides operators with an increased level of protection against electric shock. A distribution transformer can also suppress electrical noise in sensitive devices and transfer power between two circuits which must not be connected. The MT-DOE16-MV-3P-13200D-2000KVA-480Y.277-N1 achieves these safety features by separating or "isolating" the powered device from the power source and insulation between the primary and secondary power sources.

Applications: General purposes.

Larson Electronics is a manufacturer and as such can build stationary and portable transformer systems to your specifications. Although we carry several models of power distribution transformer systems, we can deliver custom ordered units almost as quickly as our prebuilt units. If this model does not meet your needs, please contact us at 1-800-369-6671 or sales@larsonelectronics.com to discuss your specific requirements.
