LED-T3.25-230V-C

T3-1/4 LED Bulb - Miniature Bayonet (BA9s) Base - 0.7 Lumens - 230V AC - 30,000 Hour Life Span

Product ID: 244194

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

LED-T3.25-230V-C T3-1/4 LED Bulb

Bulb Type: T3-1/4 LED
Weight: <1 lbs
Voltage: 230V AC
Base: Miniature Bayonet (BA9s)
Lumens: 0.7
LED Light Color Options: White, Green, Yellow or Red
LED Life Expectancy: 30,000 hours
Beam Angle: 18°
Mcd @ 20ma: 10000 - 15000
Mod in Mm: 0.40/10
Mol in Mm: 1.0/25

The LED-T3.25-230V-C from Larson Electronics is a T3-1/4 LED Bulb that operates on 230V AC and features a miniature bayonet (BA9s) base. This LED bulb produces 0.7 lumens of light and is available in white, green yellow and red colors.

LED Benefits: Unlike gas burning and arc type lamps that have glass bulbs, LEDs have no filaments or fragile housings to break during operation and/or transportation. Instead of heating a small filament or using a combination of gases to produce light, light emitting diodes (LEDs) use semi-conductive materials that illuminate when electric current is applied, providing instant illumination with no

warm up or cool down time before re-striking. Because there is no warm up period, this light can be cycled on and off with no reduction in lamp life.
LED lights run at significantly cooler temperatures than traditional metal halide and high pressure sodium lights and contain no harmful gases, vapors, or mercury, making them both safer and more energy efficient. No extra energy is wasted in cooling enclosed work areas due to external heat emissions from bulb type lights, and the operator risks associated with traditional lighting methods, such as accidental burns and exposure to hazardous substances contained in the glass bulbs, are eliminated. In addition, LEDs are also safer for the environment as they are 100% recyclable, which eliminates the need for costly special disposal services required with traditional gas burning and arc type lamps.
At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
