Adjustable Locking Magnetic Base - ALMB

Product ID: 252

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

Adjustable locking base features 360 degrees of rotation and 180 degrees of tilt. The spring loaded pem bolt enables of the user to easily change and lock the angle of rotation or tilt into one of the index holes. No amount of vibration will change the setting until the operator pulls back the spring loaded pin and selects a new position and locks that position in by releasing the spring loaded pin into one of the index holes. A 3/8 inch hole enables mounting of any post mounted light. A 5-inch diameter, 200lb grip magnetic base enables the base to secure a light on vehicles and equipment under severe vibratory conditions.
