9W Cab Light Flasher - 12V DC - Amber - Replacement John Deere Tractor Light - Turn Signal Flash Pattern

Product ID: 261139

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

LLP-JD-TR-SM-A-R1 Cab Flasher Light

Lamp Type: LED
Dimensions: 7.75" x 2" x 1.5"
Weight: <1 lb
Total Watts: 9 W
Voltage: 12 V DC
Amps: 0.75 A
Lumens: -
Beam Configuration: -
Lamp Configuration: -
LED Light Color: Amber
LED Life Expectancy: 50,000+ Hours
Ambient Operating Temp Range: -10°C to +60°C
Connector Type: 2-wire
Housing Material: -
Mount: Automotive
Wiring: Plug and Play Wiring Harness
Color: Black

The LLP-JD-TR-SM-A-R1 from Larson Electronics is a Cab Light Flasher that is a suitable replacement light for John Deere 30xx, 40xx, 50xx, 55xx, and 60xx series tractors. This low voltage, 9-watt unit features a

amber light output, turn signal flash pattern, and is compatible with 12 V DC.

The LLP-JD-TR-SM-A-R1 is a suitable replacement light for John Deere 30xx, 40xx, 50xx, 55xx, and 60xx series tractors. This 9-watt LED light operates on 12 V DC. When in use, the luminary emits amber light in a turn signal flash pattern.

The LLP-JD-TR-SM-A-R1 is compatible with the following tractors: John Deere 30xx, 40xx, 50xx, 55xx, and 60xx series tractors.

LED Benefits: Unlike gas burning and arc type lamps that have glass bulbs, LEDs have no filaments or fragile housings to break during operation and/or transportation. Instead of heating a small filament or using a combination of gases to produce light, light emitting diodes (LEDs) use semi-conductive materials that illuminate when electric current is applied, providing instant illumination with no warm up or cool down time before re-striking. Because there is no warm up period, this light can be cycled on and off with no reduction in lamp life.

LED lights run at significantly cooler temperatures than traditional metal halide and high pressure sodium lights and contain no harmful gases, vapors, or mercury, making them both safer and more energy efficient. No extra energy is wasted in cooling enclosed work areas due to external heat emissions from bulb type lights, and the operator risks associated with traditional lighting methods, such as accidental burns and exposure to hazardous substances contained in the glass bulbs, are eliminated. In addition, LEDs are also safer for the environment as they are 100% recyclable, which eliminates the need for costly special disposal services required with traditional gas burning and arc type lamps.

Applications: Replacement light for John Deere 30xx, 40xx, 50xx, 55xx, and 60xx series tractors.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
