EPL-48-2L-LED-D-V2-SP0204

Replacement Dimmable Driver for EPL-48-2L-LED-D-V2 Series LED Light Fixtures

Product ID: 265566

Please see last page for supporting documentation for this product (certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Image: EPL-48-2L-LED-D-V2-SP0204

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

The EPL-48-2L-LED-D-V2-SP0204 from Larson Electronics is a Replacement Dimmable Driver for EPL-48-2L-LED-D-V2 series LED light fixtures.

This replacement dimmable driver can be used to replace lost, damaged, broken, or otherwise compromised dimmable drivers for existing EPL-48-2L-LED-D-V2 light fixtures from Larson Electronics.

Please Note: TWO of these replacement dimmable drivers are required to per EPL-48-4L-LED-D-V2 fixture and are SOLD SEPERATELY.

This replacement dimmable driver features 0-10V dimming capabilities. This gives operators the ability to manually adjust the brightness of the LED lamp quickly and easily. The 0-10V dimming allows for adjustments to fit the brightness needs of any lighting situation. A 0-10V dimmable light works through the use of a DC control signal that ranges between zero and ten volts. The basic idea is that at 10 volts of input the light is at its brightest level with 0 volts being the lowest possible dimness setting. The smooth, continuous and flicker-free dimming of

a 0-10V dimmable LED light is ideal for a wide range of different lighting applications.

The EPL-48-2L-LED-D-V2-SP0204 can also be used to upgrade non-dimmable fixtures to having 0-10V dimming capability.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
