

MMP-F150-2028

2028 Ford F150 No-Drill Rooftop Mounting Bracket - 24" x 8" 3rd Brake Light Magnetic Plate

Product ID: 268583

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

MMP-F150-2028 Magnetic Mounting Plate for Spotlights

Type: Magnetic Mounting Plate

Compatible Truck Models: Ford F-150 Model Year 2028

Compatible 3rd Brake Light: Incandescent

Unit Weight: 8 lbs

Unit Dimensions: 24"W x 8.53"D x 4.49"H

Mounting Platform Dimensions: 24" x 8"

Bracket Height Above Cab: 1.5"

Weight Capacity: 30 lbs

Wind-load: Highway speeds

Frame Material: Aluminum

Bracket Material: Aluminum

Mounting Plate Material: Steel

Finish: Powder Coated

Color: White, Grey, or Black

Compatible Equipment: Any Magnetic Mount Equipment of up to 30 lbs

Installation: Via 3rd Brake Light (Rear Cab Light) - hardware included

Weatherproof Seal: Foam Gasket Between Vehicle & Bracket

Shipping Weight: 15 lbs

Shipping Dimensions: 30"L x 20"W x 10"H

PLEASE NOTE: BEFORE CALLING TO ORDER, YOU WILL NEED TO KNOW YOUR VEHICLE'S YEAR, MAKE, MODEL, AND IF YOUR VEHICLE HAS AN INCANDESCENT OR LED THIRD BRAKE LIGHT. THERE IS NOTHING WE CAN LOOK UP TO HELP YOU DETERMINE THIS. YOU NEED TO LOOK AT THE LIGHT AND SEE IF THERE ARE LITTLE ROUND BULBS (INCANDESCENT) OR LITTLE SQUARE LED CHIPS. WE CANNOT FINISH YOUR ORDER WITHOUT THIS INFORMATION. VERIFY LAMP TYPE BEFORE CALLING.

Ratings/Features:

Made in the USA

CNC Machined for Precision Fitment

Aluminum Bracket w/ Steel Top Plate

No Modifications Required - OEM Fitment

Works with Any Magnetic Mount Light

Durable Construction

Aerodynamic Engineered for Highway Speeds

No Rattle or Whistle While Driving

Car-wash Safe - Includes Weatherproof Seal

Special Orders - Special Requirements

Frequently Asked Questions (FAQ)

Q. Can I change the hole size after purchase (go bigger or smaller)?

A. No. Each plate is machined with the hole from factory. The only way to change the hole size is to manually drill the hole out (larger) or to order a different plate. Please verify hole size before ordering.

Q. Is this waterproof?

A. Yes. We provide a gasketed surface between the truck and the plate.

Q. Is this carwash safe?

A. Yes. The bracket is sturdy enough to go through a carwash. The equipment you install on this plate may vary. Please consult the OEM of the mounted equipment to verify if their product is carwash safe.

Q. Is this highway speed rated?

A. Yes. Each plate design has been designed to be safe for use at highway speeds.

Q. How do I run wires internally into my vehicle?

A. We suggest slitting a hole in the bottom of the gasket just large enough to run the wire up between the body of the truck and the mount. Water runs downwards, not upwards, so water should not travel inside. For extra precaution you can add a dab of silicone sealant to the exterior where the hole was cut. See instructions for directional diagram.

Q. Does it matter if I have a bed cam and do not specify when ordering?

A. Yes. The cutout for the camera in the bracket is not included if you do not specify bed camera at time of purchase. Please verify before purchasing

Q. How can I tell if I have a bed camera?

A. Easiest way is look at the 3rd brake light and check if there is a camera in the light. It will look like a small black camera, about the size of a nickel to a quarter.

Q. Does it matter if I have a LED 3rd brake light and do not specify when ordering?

A. Yes. The cutout for the LED 3rd brake light is different (deeper) than the cutout for an incandescent. They are not interchangeable. Please verify before purchasing

Q. How can I tell if I have a LED 3rd brake light?

A. Can you replace the bulbs? If yes, you have an incandescent brake light. Can you visibly see the bulb inside the housing? If yes, you have an incandescent brake light. Can you see what looks like little squares or chips where a bulb normally would be? If yes, you have a LED brake light.

Q. Can you tell me what brake light I have by my VIN number?

A. No. We do not have access to the OEM database to seem trim and options for your specific vehicle. You will have to inspect your vehicle before ordering.

Q. Will this match my vehicle with a different year?

A. We have specific part numbers set up per year / make / model designed specifically for that model made that year to ensure fitment. If there are special characteristics, such as a roof spoiler, our description and specifications will clearly state "with roof spoiler" or "without roof spoiler" to make it clear if it works with that style. Please order per your year/make/model and verify the information in the spec sheet before ordering.

Q. Will this work with my special trim package?

A. We cannot confirm every combination of trim packages, lighting packages, technology packages, and other upgrades made to a year/make/model. Please verify if you have a bed camera and if you have incandescent or LED lights. The specific trim packages (e.g. Texas Edition, Harley Davidson Edition, Denali, etc) does not matter. The size of the truck (F150, F250, 1500, 2500, etc) and if it is an HD or LD (Chevy models only) or Classic (Ram models only) matters and is specified in the part number and description for compatibility.

Q. What size holes are included?

A. The hole size is listed in the spec sheet (above).

Q. How does this light mount?

A. It mounts in between the truck and the 3rd brake light (light on the roof). We provide the additional mounting hardware to mount the bracket to the truck. You will reuse your existing mounting hardware for the light.

MMP-F150-2028

Product ID: 268583
