

MPD-SB14-CLP-FM-SZ0YW-3.CLSZ-2.CLYW-6.N99-6.N10-R1

400A Rack Mount Power Distribution - 120/250V Input - (12) Receptacles - Camlock Input/FT

Product ID: 275329

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

MPD-SB14-CLP-FM-SZ0YW-3.CLSZ-2.CLYW-6.N99-6.N10-R1 Rack Mount Power Distribution

Line-In: (1 Set) 400 A 16 Series Male Camlocks w/ Covers [Green, Brown, Orange, Yellow]

Line-Out: (3) Sets of 150 A Camlock Outputs [120/240 V] and (2) Sets of 150 A Camlock Outputs [120 V] - Feed Thru, 400 A Maximum

Primary Voltage: 208Y

System Amps: 400 A

Secondary Voltage: 120/250 V

Secondary Breakers: -

Secondary Receptacles: (6) NEMA TT-30R Travel Trailer Receptacles, (6) 5-20R GFCI Duplexes

Power Monitoring: -

Form Factor: 24.5" Rack mount ATA Case, Shock Mount 14RU ATA Cube w/ (2) Swivel Casters and (2) Locking Casters

Frame Materials: -

Dimensions: 25.75"-L x 21.50"-W x 27.00"-H

Weight: -

Larson Electronics manufactures a wide variety of custom power distribution systems. The pictures displayed for this unit are a general representation of form factor and may not accurately represent this exact configuration in every detail due to being custom builds. The specifics for this configuration are listed in the specification table and one-line diagram.

Made in Texas

The MPD-SB14-CLP-FM-SZ0YW-3.CLSZ-2.CLYW-6.N99-6.N10-R1 Rack Mount Power Distribution from Larson Electronics is a portable power solution designed for stages, movie sets, concerts, and entertainment sites. This mobile power distribution unit provides operators the ability to safely tap into and distribute 120/250 V power from a variety of sources, including generators and direct grid power, found in motion picture production.

PLEASE NOTE: ANY FREE SHIPPING OFFERS DO NOT APPLY TO POWER DISTRIBUTION PANELS, TRANSFORMERS, OR SUBSTATIONS

Portable Power Distribution Purpose and Use

The MPD-SB14-CLP-FM-SZ0YW-3.CLSZ-2.CLYW-6.N99-6.N10-R1 portable power distribution system gives operators the ability to power their 120/250 V volt equipment from a single system within live recording and entertainment venues. An accessible LCD monitor at the top of the unit allows highly visible monitoring of power usage and allocation during use. From equipment testing to live recording sets, these portable stations make power at busy production sites readily available and safe to use. On the primary side, operators connect 120/250 V line-in power using one set of 400-amp 16 series male camlock inputs with protective covers (green, brown, orange, yellow) and to (3) sets of 150 A camlock outputs [120/240 V] and (2) sets of 150 A camlock outputs [120 V] for feed-through operation. The secondary side contains (6) NEMA TT-30R travel trailer receptacles and (6) 5-20R GFCI duplexes.

Operation: One set 400-amp 16 series male camlock inputs with protective covers (green, brown, orange, yellow) brings 120/250 V into the primary side of the 400-amp mobile power distribution unit, which contains (3) sets of 150 A camlock outputs [120/240 V] and (2) sets of 150 A camlock outputs [120 V] for feed-through operation. The secondary side is equipped with (6) NEMA TT-30R travel trailer receptacles and (6) 5-20R GFCI duplexes.

Protective Construction: All components are secured inside a compact 24.5" (14U) rack mount ATA case. This black case features side-located handles for mobility around the production or recording site. Four casters (two swivel and two locking) are available at the bottom of the power distribution unit, which allows operators to move the station easily without lifting. Dual locking casters ensure stable use and safe storage when being transferred in trucks or other large vehicles. This durable case is resistant to shock and takes on a standard design that is similar with professional recording equipment. It can withstand frequent handling around live stages and loading/unloading at outdoor locations.

Certification: All units are built in accordance to NFPA 70 (National Electric Code) and certified to UL 1640. All equipment is NEMA 3R rated for indoor and outdoor use and provide a degree of protection against dirt, water, and ice. NEMA 4 and NEMA 4X equipment can be equipped upon request.

Applications: This power distribution system is ideal for indoor or outdoor use and applications including but not limited to, movie sets, entertainment, television sets, stage lighting, studio recording, sporting events, rigging, audio and video production, concerts and motion picture production. These power distribution systems are popularly used in applications where external power sources are often necessary. We also offer class rated transformers for use within explosion proof and hazardous location environments.

Custom Built Systems Available: Larson Electronics is a manufacturer and we can build portable power distribution systems to your specifications. Although we carry several models of portable power distribution systems in stock, we can deliver custom ordered units almost as quickly as our prebuilt units. If this model does not meet your needs, please contact us at 1-800-369-6671 or sales@larsonelectronics.com to discuss your specific requirements.
