RL-85-10W1-R2-MS

10W LED Light - Rechargeable L-ion - Pistol Style - 800 Lumens - 1500' X 100' Beam - 4° Spot Optic - Momentary Switch

Product ID: 275605

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

RL-85-10W1-R2-MS Spotlight w/ Momentary Switch

Lamp Type: LED

Dimensions: 4.5"-L x 1.5"-Depth x 5/8"-W

Weight: 14.0 oz

Watts: 10 Watts

Voltage: Rechargeable - Universal Smart Charger

Lumens: 800

Lamp Life Expectancy: 120,000 Hours

Beam Lux: At 10 Ft: 1,050 At 15 Ft: 390

Beam Output: 1500' x 100'

Switch: Momentary Switch

Battery: Lithium Ion

Charge Time: 2.5 Hours

Light Color : 6000K

Beam Type : Very Tight Spot

Need more power? Take a look at our High Intensity Discharge (HID) Spotlight with 3200 lumens and 15 million Candlepower

Features

High Output 10 Watt LED

Lightweight Pistol Grip Design

No Tools Field Serviceable

120,000 Hour LED Lamp Life

Heavy Duty Nylon and Aluminum Construction

Rechargeable Lithium Ion Battery

4° Spot Optic

Equipped with Momentary Switch

The Larson Electronics RL-85-10W1-R2-MS LED Pistol Grip Spotlight is an extremely rugged and effective spotlight designed to give users a powerful, durable and easy to use source of reliable light. This spotlight produces 800

lumens and a light beam approximately 1500` long by 100` wide with a 4° spot optic, creating a very tight, pencil beam output. This pistol grip spotlight requires no tools for servicing and runs for 5 hours on a single charge. The RL-85-10W1-R2-MS is equipped with a momentary switch.

This light weight, 10 watt LED spotlight is ergonomically designed to produce a well balanced and easily managed handheld light source that can withstand abuse under tactical conditions and operate for 5 hours on a single charge of its integrated lithium ion battery pack. This light contains a single 10 watt LED rated at 120,000 hours of operational life which is paired with a patent pending reflector design to produce a light beam that reaches 1500 feet in length and 100 feet in width. The beam has a 4-degree spot optic, which results in a very tight, pencil beam light output, ideal for far distances. This beam is strong enough to allow operators to read signs, license plates, addresses and other similar markings at the far end of its total range.

This pistol grip spotlight is designed for durability with a handle constructed of high impact nylon and an LED fully potted within a lamp assembly constructed of machined aluminum. The LED lamp assembly is protected by a thick Lexan lens and the integral lithium ion battery pack provides long battery life rated at 1,000's of charge cycles. This lamp and the materials it is constructed from are water, UV ray, impact and vibration resistant and designed to be easily field serviceable. This unit requires no tools to remove any components and the internal connectors are accessed through a snap in base at the bottom of the handle.

Power for this spotlight is provided via an integral lithium ion battery pack for the highest reliability and durability possible. This unit charges in 2.5 hours and provides 5 hours of runtime when fully charged. The lithium ion batteries used in this unit do not require special charging practices to preserve their effectiveness or longevity and can be recharged when only halfway depleted or only charged to a fraction of their full capacity and will not suffer from degradation or battery memory issues. This means you do not need to wait until the batteries are fully depleted before recharging them, nor do you need to allow them to fully recharge before using the unit. This allows users to operate this unit at any time without having to follow complex or highly inconvenient battery charging procedures.

Periodically, Larson Electronics donates some RL-8510W-1 lights to the Kuala Gandah Elephant Sanctuary. The elephant sanctuary was established in 1989 within the Krau Wildlife Reserve, and is managed by the Malaysian Department of Wildlife and National Parks. Here many orphaned elephants are raised and given shelter. Not long after tourists found out about the elephant shelter the town quickly evolved into a popular tourist attraction. Kuala Gandah (Lanchang) is probably the best place on Peninsular Malaysia to come face to face with an elephant.

Lithium Ion Reliability: The lithium ion batteries used in this unit do not require special charging practices to preserve their effectiveness or longevity and can be recharged when only halfway depleted or only charged to a fraction of their full capacity and will not suffer from degradation or battery memory issues. This allows users to use this unit at any time without having to follow complex or highly inconvenient battery charging procedures. Finally, these batteries hold their charge for up to 12 months, allowing users to avoid the need for constant maintenance charging. The included universal smart charging unit is compatible with any voltages both domestic and international and plugs into any standard wall outlet. The smart charger that ships with this light operates automatically and will top off the battery and quit once the battery is fully charged, even if the light is left connected to the charger once fully charged.

Durability-Convenience: The RL-85-10W1-R2-MS Pistol Grip LED Spotlight contains a single LED that is fully potted within a machined aluminum lamp housing and protected by a thick Lexan lens. This LED has an expected life span of 50,000+ hours and the entire LED lamp housing can be removed and replaced. This light is constructed of UV, water and impact resistant materials including a handle constructed of high impact nylon for extreme durability and resistance to damage from vibrations, shocks and impacts. The machined aluminum lamp housing is finished with an anodized coating for corrosion resistance. 16 gauge wiring is used to connect the internal components for maximum reliability and durability.

Switch: The RL-85-10W1-R2-MS is equipped with a momentary switch. In other words, when the switch is held down, the light turns on and when it is released, the light turns off.

Versatility: The entire unit weighs only 14 ounces. This light has a 3/8-16 inch brass nut fastener imbedded in the base of the handle to allow mounting this light to a tripod or magnetic base like our MM-2 or MM-5. We also offer permanent mount bases, which can be screwed into the base as well. This unit is fully field serviceable and requires no tools to disassemble or reassemble. This unit is ideal for military, security and law enforcement as well as hunting and any application that requires an extremely durable and effective source of portable illumination.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories.

Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
