Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

SL-360-M-WR-R-4X-WP Red LED Beacon Kit

Lamp Technology: LED

Lamp Qty: (4)

Single-lamp Dimensions: 5" - Diameter 4 1/2" - Height

Single-lamp Weight: 1 lbs

Voltage: DC

Total Watts: -

Lumens: -

Luminous Efficacy: -

Lamp Life: 50,000+ Hours

LED Color: Red

Color Rendering Index: -

Beam Angle: 360°

Lighting Configuration: Strobing Flash

Remote Control: (1) Wireless, Controls All LED Lights

Operation: On/Off Switch for Overall Power/ 2.4 Ghz Wireless Remote for On/Off Light Control

Amps: -

Ambient Operating Temp Range: -

Housing Material: -

Housing Finish: -

Lens Material: -

Mounting: Magnetic Mount

Ratings/Features

Compact & 100% Portable

Waterproof / Shock Resistant

Battery Powered

94 Hours Continuous Runtime

Strobe Operation

Special Orders - Special Requirements

The Larson Electronics SL-360-M-WR-R-4X-WP is a Red LED 360 Degree Beacon Kit that is suitable for signaling, warning and visual notifications in outdoor or industrial sites. This kit comes with four LED beacons and one wireless remote control. The LED beacons are battery powered and provide up to 94 hours of continuous operation on a single set of four AA batteries. Magnetic mounting ensures a highly effective alternative to traditional beacons that require wiring and special permanent mounting.

The SL-360-M-WR-R-4X-WP consists of four red LED beacons with one wireless remote. Each compact LED beacon contains a 20 LED lamp assembly that produces a brilliant signal visible for extended distances. The LED beacon is red in color and is 100% portable, with a magnetic mount and battery operation that allows it to be operated wherever a powerful beacon is needed. This unit has an on/off switch at the bottom to control overall power, and features wireless on/off functionality of the light, which is controlled by a 2.4Ghz wireless remote. This wireless remote has a 50-foot working distance from the light. With no need for wiring or external power sources, the light is ideal for applications where a signal light is needed on an occasional or temporary basis such as farm equipment, warehouse equipment, cars or trucks.

LED Benefits: Unlike gas burning and arc type lamps that have glass bulbs, LEDs have no filaments or fragile housings to break during operation and/or transportation. Instead of heating a small filament or using a combination of gases to produce light, light emitting diodes (LEDs) use semi-conductive materials that illuminate when electric current is applied, providing instant illumination with no warm up or cool down time before re-striking. Because there is no warm up period, this light can be cycled on and off with no reduction in lamp life.

LED lights run at significantly cooler temperatures than traditional metal halide and high pressure sodium lights and contain no harmful gases, vapors, or mercury, making them both safer and more energy efficient. No extra energy is wasted in cooling enclosed work areas due to external heat emissions from bulb type lights, and the operator risks associated with traditional lighting methods, such as accidental burns and exposure to hazardous substances contained in the glass bulbs, are eliminated. In addition, LEDs are also safer for the environment as they are 100% recyclable, which eliminates the need for costly special disposal services required with traditional gas burning and arc type lamps.

The SL-360-M-WR-R-4X-WP LED beacon is durably built and resistant to shocks and vibrations. The durable housing and lens is designed to provide high strength and a small size,

allowing easy placement in tight spaces. Dimensions for the lamp assembly are 5 inches in diameter by 4 1/2 inches high. This strobe flashes once per second and runs continuously for up to 94 hours on a single set of four AA batteries.

Applications: The durability, portability, and power of this LED beacon make it ideal for towing, forklifts, cranes, trailers, security, warehouses, and anywhere a fast and simple beacon solution with plenty of power is needed.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
