LEDXSL-16W-IR-940NM

16W Vehicle Identification Infrared LED Light - 12-36V DC Input - 940nm LED - Saltwater Approved/IP67 Rated

Product ID: 278614

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

LEDXSL-16W-IR-940NM IR LED Vehicle Patrol Light

Listing: -
Lamp Technology: IR LED
Dimensions: 2.5" x 3.5" x 0.5"
Lamp Quantity: 2
Weight: -
Voltage: 12-36 V DC
Frequency: -
Total Watts: 16W
Single Lamp Watts: 8W
Minimum Lumens: -
Maximum Lumens: -
Luminous Efficacy: -
Lamp Life: 50,000+ Hours
IR Wavelength: 940nm
Color Rendering Index: -
Lamp Type: -
Lamp Base: -
Replacement Lamp: -
Beam Angle: Full, 360°

Ratings

Buy American Compliant
Made in USA
JEDEC Level 1
IP67 Waterproof Rated
Shock Resistant
Saltwater Approved

Beam Coverage Area: 360° x 210°

Lighting Pattern: Variable, User Defined

Flash Pattern Control: Trigger Wire

Power Factor: -

Thermal Resistance: 1.1°C/W

Ambient Operating Temp Range: -
Housing Material: Polycarbonate
Finish: -
Lens Material: -
Mount: Two Hole Permanent Flush Mount
Wiring: 16 AWG Wire (Customer Provided)

The LEDXSL-16W-IR-940NM from Larson Electronics is a Vehicle Identification Infrared LED Light that generates powerful infrared light for reliable vehicle marking, signaling and identification at night. This 16-watt LED unit provides 940nm infrared light with selectable flashing patterns. Weatherproof and extremely versatile, the compact LED light is IP67 rated and approved for use in saltwater locations.

The LEDXSL-16W-IR-940NM is a superior infrared LED light for discreet vehicle identification, marking or paroling at night in rugged environments. This 16-watt light operates on 12-36 V DC input (including commonly found 12 V, 24 V military vehicles, 12 V civilian vehicles and 36 V heavy equipment). The LED lamp assembly produces 940nm infrared light without the dark spots or uneveness of traditional incandescent beacon lights. This unit is paired with a specially designed clear optical lens for complete 360° x 210° coverage. Operators can change flashing patterns using a trigger wire. The LED driver is secured on the board, inside the unit.

The LED is solid state and uses no filaments or glass in its construction, resulting in an extremely durable light that can withstand far more abuse than regular filament based beacons. The unit is IP67 waterproof rated and offers a wide variety of flash patterns that can be set by the operator. This LED light is saltwater approved and recommended for extreme environments.

LED Benefits: Unlike gas burning and arc type lamps that have glass bulbs, LEDs have no filaments or fragile housings to break during operation and/or transportation. Instead of heating a small filament or using a combination of gases to produce light, light emitting diodes (LEDs) use semi-conductive materials that illuminate when electric current is applied, providing instant illumination with no warm up or cool down time before re-striking. Because there is no warm up period, this light can be cycled on and off with no reduction in lamp life.

LED lights run at significantly cooler temperatures than traditional metal halide and high pressure sodium lights and contain no harmful gases, vapors, or mercury, making them both safer and more energy efficient. No extra energy is wasted in cooling enclosed work areas due to external heat emissions from bulb type lights, and the operator risks associated with traditional lighting methods, such as accidental burns and exposure to hazardous substances contained in the glass bulbs, are eliminated. In addition, LEDs are also safer for the environment as they are 100% recyclable, which eliminates the need for costly special disposal services required with traditional gas burning and arc type lamps.

Wiring: The LEDXSL-16W-IR-940NM is compatible with customer-provided 16 AWG wiring.

Mount: Equipped with two mounting holes, the machined polycarbonate base is designed for flush mounting and offers a wide degree of mounting versatility, as well as ease of installation.

Suggested Applications: Outdoor sites, vehicle identification, signaling, marking, paroling, marine environments, military, fleet vehicles, and more.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or

accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
