SM-B-42

Stanchion Post Mount with Red & Green Running Lights and Perko Sliding Door Socket - 42 Inches

Product ID: 278995

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

42 inches stanchion mount post that has 2 pin connectors in the base. The base slides and locks into a sliding door Perko socket. The Perko socket can be attached to any surface including fiberglass and will securely hold the light in place. The red and green running lights are generally wired serially, so that they go on when power is sent to the unit (via dash mount toggle, for example). This assembly can be used to mount to an existing Golight Radioray (GL-2000 series) spotlight or just about any light. There are several mounting holes, including 3/8 - inch mount for most HID stud mount lights, like the 24 volt equipment lights, HID boat lights or just about any brand of off road halogen or HID light.
