LML-7-CU12-EW

12' Telescoping Light Mast - Stationary Tower w/ Electric Winch

Product ID: 279255

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

This unit is Made In USA - Manufactured in Texas

This unit is Made In USA - Manufactured in Texas

The Larson Electronics LML-7-CU12-EW Telescoping Light Mast provides a safe and effective way for operators to quickly deploy lights, security cameras and other equipment to elevations up to twelve feet. This light tower collapses down to seven feet and features a removable mast head for storing mounted equipment when not in use. An included 12V electric

winch is available for raising and lowering the tower.

PLEASE NOTE: ANY FREE SHIPPING OFFERS DO NOT APPLY TO LIGHT MASTS OR LIGHT TOWERS

The LML-7-CU12-EW is designed to allow operators to quickly and safely deploy lighting and other electrical equipment in locations where this equipment must be elevated to heights up to 12` for effective light coverage. This adjustable and collapsible light mast can be extended to twelve feet and collapsed to seven feet and is locked into position with t-handle locking pins. The tower is constructed of square steel tubing with a lower section 6.5` in length and 3" by 3" by 1/8" thick and an upper section 6.5` and 2" by 2" by 1/8" thick with 1` overlap. The unit is extended and lowered using an included electric winch with 3/16" galvanized braided cable with brakes for fast and safe deployment.

The LM series of towers are powder coated with glossy blue finish for corrosion resistance and aesthetics. Powder coated black and galvanized coatings for superior corrosion resistance are available as options. These light masts are typically mounted to trailers or other stable surfaces via a 12" by 12" by 1/2" thick square mounting base-plate which has been drilled to accept four 3/4" anchor bolts. A 44" wide and 2" by 2" by 1/4" thick mounting plate is attached to the upper section of the mast which provides a strong and stable platform for light fixtures and equipment.

This is a heavy-duty unit designed for use in demanding conditions and for overall longevity in difficult construction environments with rugged steel construction for maximum durability. We make this lighting solution in the United States.

Applications: Larson Electronics light towers are designed for industrial, commercial, emergency response, and military applications where operators are working in harsh, destructive environments.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
