Made in the USA

The IND-CS-RLY.TDR-208V-240V-40A is a NEMA 3R time delay relay timer for reliable switching or controlling functions.

In the event of a power outage, the timed relay will allow the customer to use a predetermined time (usually 30 secs) on the timer to control when power is received to the contactor coils after power is restored. After the phase converter is restarted, the output will delay the predetermined time before the load is turned on. This will ensure the Phase Converter does not try to start under a load. At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation.
