

MT-PML-XX-SP9624

Oil-immersed Current Limited Backup Fuse for MT-PML and MT-UPM Series Transformers - 350A, 35kV

Product ID: 326063

Please see last page for supporting documentation for this product (certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

MT-PML-XX-SP9624 Current Limited Backup Fuse

Unit Type: Current Limited Backup Fuse

Dimensions: 24"-L x 4.0"-D

Weight: 35.0 lbs

Continuous Voltage Rating: 35 kV

Continuous Current Rating: 350A

Max Interrupting Current: -

BIL and Full Wave Crest: 150 kV

Materials: -

Mount: -

Wiring: -

Features

Compatible with Larson Electronics Pad Mount Transformers

The MT-PML-XX-SP9624 Oil-immersed Current Limited Backup Fuse from Larson Electronics is suitable for MT-PML and MT-UPM Series Transformers. This unit has a 35 kV continuous voltage rating.

The MT-PML-XX-SP9624 is designed for use in a pad-mounted or subsurface distribution transformer. It is used with fuse link for secondary short circuit fault protection of a transformer,

such as current sensing fuse link, dual sensing fuse link and dual element fuse link.

The fuse holder features a flapper valve inside the housing which closes when it is removed. This results in minimal oil spillage from the transformer tank which increases safety to line personnel during fuse change outs and reduces potential of environmental concerns with oil pillage and potential of oil contamination on the molded rubber elbow connections.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
