C-21-UBWH

C-21-UBWH 21' cord - AMP 10SL Round Military Connector and Y Harness for 2 Ultralife 2590 Batteries

Product ID: 345

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

21 foot cord with AMP 10SL round military connector on one end and 2 wire Y-harness on the other with 2 polarized 5 pin round military connectors on the other. The cord enables the user to connect 2 Ultralife 2590 rechargeable batteries to the harness. The C-21-UBWH harness is used to power any 24 VDC Larson Electronics military spotlights, including the HML-5M (HLM-5M) and the HML-6M (HLM-6M) handheld spotlights with magnetic base.
The harness includes circuitry that prevents one battery from recharging the other. Effectively, the batteries are run in parallel, increasing amp hour capacity. Thus, this cable will enable the operator to run the HML-5M for 6 hours and the HML-6M for 8 hours.
