ATX-4800

ATX-4800 Spare Lithium Ion Battery - 4500 mah

Product ID: 46375

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

4800mah lithium ion battery for ASX-25 and ASX-20 Flashlights.
The battery for the ASX is actually potted and sealed into the aluminum housing. The battery is actually the back half of flashlight. You unscrew that flashlight, separating it into 2 pieces (this must be done to place it in the case normally). You can replace and/or swap the battery by simply screwing on the battery/housing assembly.
