

LEDPL-3

LED Keychain Light - Task Light - 120 Lumen - 330' Beam

Product ID: 46788

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

LED Keychain Light - Task Light is a small light with a great output. Measuring only 3.4" in length and less than an inch in diameter, yet still capable of illuminating objects several hundred feet away. It's lightweight but durable Mil-spec anodized aluminum housing makes it suitable for harsh environments, weatherproof, and submergible up to 10 meters.

The Cree LED produces 120 lumen and can be ran for approximately 90 minutes using only one CR123 battery. Pure, white light is emitted that is ideal for close in illumination but still can be used for up to several hundred feet.

Makes a great work light, vehicle light, pocket light, emergency house, any situation where a strong, pure, white light is needed.

Lumen: 120

Projection Distance: Approx. 330ft

Color Temp: 6000K

Length: 3.35"

Weight: 2oz.

This image shows a dark street, similar to a long, narrow corridor. Illuminated by nothing but a street lamp in the distance. (625` away)

This image shows the same dark street illuminated by the LEDPL-3, beam projection is measured at 329` (Operator can read a book at 329 feet)
