Anti-Shock Mounts for Explosion Proof Lights - Two Mounts per Kit

Product ID: 46811

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

Integrated heavy rubber bushings in these Beam Clamp Mounts provide additional support for our fluorescent and LED style explosion lights for oil rigs and other vibratory environments. The round portion of the mount attaches to the explosion proof lights in the same way as our standard mounts that accompany the standard fixture.

Included: (2) mounts per kit
