HAL-WG

Wire Guard Lens Protector for HAL series hazardous Location Lights

Product ID: 46984

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

Wire Guard Lens Protector for Explosion Proof Fluorescent Lights
2 inch square pattern in aluminum mesh lens cover for the explosion proof fluorescent lights. Each wire guard is secured to the housing on the HAL-48 fluorescent and LED series, protecting the aluminum enclosured tubes from accidental damage. Each wire guard protects a single 2 lamp fixture.
The T-series fluorescent or LED tube lights are sealed within the enclosure created between the aluminum housing and the hi-impact acrylic glass. In applications, where operators may come into contact with the light fixture, wire guards can prevent tools or other objects from damaging the hi-impact acrylic glass.
