

**15 Million Candlepower HID Spotlight w/ Red Lens - 1900' Spot Beam - 35 Watt HID - 120V Wall Charger**

Part #: [RL-85-HID-RED](#)

**Buy American Compliant**

The Larson Electronics RL-85-HID-RED is an extremely rugged and powerful spotlight designed to provide maximum output and complete portability. This spotlight is fitted with a red hunting lens and produces a light beam capable of reaching over 1900 feet in length. An included rechargeable lithium ion battery pack provides over 2 hours of runtime and high impact nylon and unbreakable polycarbonate construction provides light weight operation and extreme durability.

This light weight and waterproof 35 watt HID spotlight is fitted with a red lens for hunting applications and is ergonomically designed to produce a well balanced and easily managed handheld light source that can withstand demanding conditions and use. The entire unit weighs only 3 lbs 6 oz and is constructed with a high impact nylon handle and lamp housing and a thick polycarbonate lens for extreme durability. The unique lens and reflector design of this unit allows it to produce a high quality spotlight beam with exceptional intensity and long reach without irregularities or lens artifacts. The included red lens makes this unit well suited for hunting predators at night as they are less sensitive to light in the red end of the light spectrum.

Users can also lift the locking tab behind the lamp housing and rotate the lamp head to adjust the beam configuration. Rotating the housing adjusts the beam from a wide, soft flood pattern to a tight, spot beam reaching up to 1900 feet in length. Continued rotation to the extreme disconnects the lamp head from the handle assembly, allowing operators to quickly and easily replace the bulb when necessary.

Backed by a 3 year warranty, our RL-85-HID-RED rechargeable handheld spotlight is ideally suited for hunting applications and spotting.

*"When it comes to hunting predators I want every advantage I can get. I trust my success to Larson Electronics. They are without a doubt the best spotlight you can find for night hunting." - Dustin Butler, Team Foxpro*

This units' reflector is designed to provide maximum efficiency and power by capturing and focusing all of the light produced by the 35 watt HID bulb. The shallow convex lens produces minimal light loss and beam spillage with over 90% of the produced light concentrated and focused. While many typical spotlights lose as much as 50% of their output to light escaping around the lens and creating beam spillage, our spotlight produces a well focused and directed light beam of excellent intensity and power. The 35 watt bulb in this unit is rated at 4500 hours of

operational life and produces 15 million rated candlepower.

The compact lithium ion battery pack is recharged in 4 hours by an included 120 VAC wall outlet plug in charging unit and provides 2.5 hours of operation. A booted push button switch provides easy one finger operation and the no-slip textured surface of the handle provides a sure grip even in wet conditions. A lanyard attachment at the top of the handle adds further protection against dropping should operators lose their grip. The ergonomic handle is 4.5 inches long, 1.5 inches deep and 5/8 inch thick, and the battery pack casing is approximately 4.5"L X 3.5"W X 2.5"D. The RL-85-HID-RED spotlight is designed for easy field maintenance with simple internal connectors accessed through the snap in base at the bottom of the handle and a lamp housing that is easily removed to access the bulb and wiring. No tools are required to change any part of the light including the bulb and battery pack.

**5 inch lens**

**[Click Photos to Enlarge](#)**

**7 inch lens (Optional)**

We also now offer a 5 inch diameter and a 7 inch diameter lens. Although the difference is not significant, the 5 inch lens produces a tighter spot beam while the 7 inch lens produces a wider coverage flood pattern.
