

EPL-TP-Stand-3.5

Short Accessory Stand for EPL-TP Series Explosion Proof and Hazardous Location Lighting

Product ID: 48372

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

Short Stand for various Explosion Proof Lighting and Hazardous Location Lighting.
Lightweight aluminum stand enables the operator to take the one or two light heads off various taller tripod mount and quadpod mount explosion proof lights and mount them on a shorter stand with a 3.5 foot height from the floor. The upper mounting bracket is universal to this short stand and all the tripod mount and quadpod mount explosion proof lights. The operator can place the entire upper bracket with light and cord assembly on to the short stem of the stand. Made from tubular aluminum and powder coated and/or painted, the stand enables the operator to place the lights closer to floor while accessing manways. Once inside the tanks, the operator can place the light head back on the full wheeled tripod or taller quadpods.
Dimensions: The cross pattern of the base is 24 inches in length. Height is 3.5 foot.
