

EPP-HL-15A

EPP-HL-15A - Explosion Proof Handlamp Plug Upgrade and Installation

Product ID: 48591

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

EPP-HL-15A Explosion Proof PLug

Amp Rating: 15

Dimensions: 2.78"-L 1.75"-W

Configuration: 3 Pole 2 Wire

Suitable Cable Diameter: .538" to .639"

Materials: .Copper Free Aluminum

Installation: Included With Lamp of Choice

Certifications - Compliance

Class 1, Div 1 & 2 Groups B,C,D

Class 2 Div 1 & 2 Group G

Class III

CSA Type 7BCD, 9G

The Larson Electronics EPP-HL-15A Explosion Proof Plug Installation upgrade for explosion proof and hazardous location hand lamps gives our customers the option of having their selected Larson Electronics explosion proof hand lamps equipped with an explosion proof plug when ordering. This upgrade allows operators to connect their explosion proof lamps within the hazardous area to reduce the need for additional extension cords or hardware.

**This same cord cap is available to purchase separately without installation under sku EPP-15A.*

The EPP-HL-15A explosion proof plug upgrade includes our 15 amp rated EPP-15A explosion plug and installation on the hand lamp of your choice. Along with our

with our EPP-20A series plug, this EPP-15A plug is compatible with our EPO-20A explosion proof 20 amp outlet and is cross-interchangeable with Crouse Hind™ ENP general purpose plugs. This plug can be used in both regular 120V outlets and T style outlets although in order to retain explosion proof compliance, it must be mated to an explosion proof outlet. This plug is designed to lock into compatible receptacles by twisting the plug body until an audible click is heard, which indicates the plug is securely connected. Once locked into place this plug will not accidentally pull out. This plug is ideal for applications where moisture and corrosion is a problem and well suited for use in marine and manufacturing environments.

This plug upgrade allows operators to connect their explosion proof hand lamps within the hazardous area. This provides convenience and improves lamp effectiveness by allowing the operator to use the full length of the lamps' cord rather than require additional extension cords to make up for cord length lost to connecting outside of the work space. This also reduces the inconvenience and danger of dragging around excessive lengths of extension cord within the workspace that can create tripping hazards.

This plug is rated for Class 1, Division 1 and 2 and Class 2, Division 1 and 2 and is suitable for use in areas where petrochemical vapors may be present. This explosion proof plug features non sparking aluminum construction, a longer housing for easy handling, specially designed brass pins for secure full length pin contact and a 15 amp current rating.

Inter-Compatibility: These plugs will fit non-explosion proof standard receptacles (NEMA 5-15R, 5-20R, or 6-20R). These plugs are cross-interchangeable with Crouse Hind™ ENP general purpose plugs. Any equipment requiring these C-H plugs should work with these plugs. Due to possible manufacturer changes we cannot guarantee interchangeability although we have made every effort to ensure cross compatibility correctness.

Suggested Applications: Manufacturing, Industrial, Warehouse, Lighting, Motor-Generator Sets, Compressors, Wet areas or Locations Where Petrochemical Vapors are Present.
