RENTAL Explosion Proof 250 Watt Incandescent Light on Quadpod - 100' SOOW Cord - Extends 4.5 - 8'

Product ID: 48666

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

The Larson Electronics RNT-EPL-PM-1x300-TP1-100 Quadpod Mounted 300 Watt Explosion Proof Incandescent Light is UL Listed Class 1- Groups C and D and is rated for use in wet and marine environments. The quadpod mount and Par38 lamp used with this unit provides operators with excellent power and efficiency coupled with high versatility and ease of use.

This explosion proof incandescent light is mounted on our non-sparking collapsible quadpod, giving operators an easily deployable source of powerful light that can be quickly setup and adjusted to effectively illuminate hazardous work areas, then easily stowed and transported between uses. This unit`s durability, easy deployment, high power and good color rendering make it ideal for first responders and emergency services.

The non sparking collapsible quadpod weighs only 23 pounds and can be extended to 12 feet and collapsed to 4.5 feet. Both the shaft and legs of the non-sparking quadpod are collapsible. The quadpod can be easily detached from the light aiding in deployment, storage and transport. The quadpod affords operators the ability to quickly and securely elevate this lamp, increasing its effective coverage of the work area. The lamp can be easily adjusted up, down or from side to side and locked into position. The lamp housing is waterproof and constructed of thick copper free aluminum alloy, making it ideal for use in wet and marine environments.
