

UHC-500PK

Concealable Backup Universal Handcuff Key (Plastic Handcuff Key) - 500 PACK

Product ID: 48689

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

Universal "plastic" handcuff key opens all brand of cuffs. Flat, round shape conceals its purpose as a handcuff key. Made from thermoplastic resin blend, this durable, lightweight handcuff key evades metal detectors and can be hidden behind shirt and pant buttons or siliconed beneath watches and mace cans.

In the event that personnel are trapped in a pair of handcuffs or related restraints, they can silently and remove these universal handcuff keys hidden on their uniforms. Using their thumb and index finger on one hand, they can silently twist out the universal cuff key from its retaining ring and unlock the cuffs. While slightly larger than a nickel the unique design of this universal handcuff key enables the user to secure the cuff key behind buttons on any type of clothing, while buttoning the clothing normally over top the key. The extremely lightweight form factor does not show on the clothing, nor does it create any telling ripples or wrinkles in the clothing. The exact size of the unit matches the back of many watches, including the Timex Iron Man and the Casio G-Shock watches. Users can silicone the key to the back of the watch. The key blends with the shape, size and material of these watches, so its presence is seamless and undetectable.

The special material blend is critical to the function of this universal key. The cuff key is lightweight and durable enough to be used as a daily cuff key. However, the key itself can be

easily and silently removed from its retaining ring with a single index finger and thumb. This "plastic" handcuff key works on all brands of handcuffs. Existing users of the handcuff key usually wear between 4 and 12 keys on their person. In various test situations, various searches by seasoned law enforcement personnel typically only finds a few of the keys. This is original, patented, concealable handcuff key. This handcuff key really is your "key to surviving a hostage situation."
