EPL-24-SCK-T8-LED24W

Bulb Socket for the T8 Fluorescent Bulb and LEDT-24W LED Light Tube - 2 Foot Configuration

Product ID: 48706

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

These sockets are specially made to fit the T8 Bulb/Prongs, as well as our own Larson Electronics LED tube lamps. The sockets allow the current to run to the tubes in order to produce light. These units fit the T8 fluorescent and the LEDT-15W, 2 foot bulbs. What makes these unique is that they are non-shunted, so they can be wired up for separate hot and neutral pins.
