RNT-EPL-BS-70-TP1-100

RENTAL Explosion Proof Metal Halide Light - 70 Watt - Tripod Mount - 100' Cord - Hazlo Plug

Product ID: 48769

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

RNT-EPL-BS-70-TP1-100 Tripod Mounted
UL Listing: United States - Canada
Dimensions Lamp Only: W-13 1/4" D-12 1/2" H-11 1/2"
Weight: 56 lbs. including Tripod
Total Watts: 70 watts
Voltage: 120 Volts AC, .58amp draw
Coverage: 7,000 square feet
Lamp Life Expectancy: 10,000+ Hours
Lamp Type: Metal Halide
Operating Temp Range: T4 rated
Beam Lux: >8500@ 1 Meter 1250@ 3 Meters
Mounting: Non Sparking 4` to 9` Extendable Tripod
Wiring: 100` SOOW Cord ECP1523 plug
Rental Type: Monthly, Weekly, Daily

U.L Approval: U.S Certificate Canada Certificate

Rentals: In an effort to cut back on contracts and various other paper work, Larson Electronics processes rentals like purchases until the product is returned. (Rent to Own Rates) This means, we will charge the customer for the product total and credit back the difference once the fixture is returned. Weekly and Monthly terms are available. Customer must pay shipping to and from the destination. Please contact us at (903) 498-3363 for further information if required.Rental prices for the EPL-TP-1X70-100 ;
Monthly...$498.00 USD
Weekly...$300.00 USDSubtract rental cost from total cost for the amount that will be credited back to customer upon return of product. Customer can choose to convert their rental to a purchase at any time during the rental period. When returned, deductions will also be made for shipping, repairs, and excessive cleaning, if needed.

The Larson Electronics RNT-EPL-BS-70-TP1-100 Tripod Mounted Explosion Proof Metal Halide Light is U.L. approved Class 1 2, Division 1 2 and is rated for use in wet and marine environments. The adjustable tripod mount and metal halide lamp used with this unit provides operators with excellent power and efficiency coupled with high versatility and ease of use.

PLEASE NOTE: ANY FREE SHIPPING OFFERS DO NOT APPLY TO LIGHT MASTS, LIGHT TOWERS, OR QUADPODS

This explosion proof metal halide light is mounted on our non-sparking aluminum collapsible tripod, giving operators an easily deployable source of powerful light that can be quickly setup and adjusted to effectively illuminate hazardous work areas, then easily stowed and transported between uses. This unit contains a 70 watt dual ended metal halide lamp and is capable of illuminating 7,000 square feet of work space with 5,500 lumens of light. The 70 watt metal halide lamp produces illumination equivalent to a typical 400 watt halogen bulb while drawing only 70 watts at .58 amps.

The metal halide lamp on this tower is mounted with a removable spun aluminum pedestal base. Operators can remove the lamp from the tower and use the lamp independently as a portable pedestal light in areas where using the tower is impractical.

---

The non sparking collapsible tripod weighs under 8 pounds and can be extended to9 feet and collapsed to4 feet. Both the shaft and the legs are completely collapsible, making it ideal for applications where portability is ideal. The tripod can be easily detached from the light aiding in deployment, storage and transport. The tripod affords operators the ability to quickly and securely elevate this lamp, increasing its effective coverage of the work area. The lamp can be easily adjusted up, down or from side to side and locked into position. Operators can also remove the lamp from the tripod and utilize it as a standard pedestal light when using the tripod is impractical and a more portable light is needed.The lamp housing is waterproof and constructed of thick copper free aluminum alloy, making it ideal for use in wet and marine environments. The metal halide lamp provides 7,000 square feet of coverage with good color rendering and object contrast. This unit`s lamp assembly includes a 70 watt metal halide bulb, internal ballast and aluminum finish reflector in a copper-free cast aluminum housing with a thermoset powder coat finish. The shell, covers and sealed fittings are also made of copper-free aluminum. The lens is constructed of thermal shock and impact resistant tempered glass and the housing contains threaded joints lubricated with non-drying lubricant.The metal halide lamp in this unit has no filament and is thus highly resistant to damage from shocks or impacts, greatly reducing the chances of damage should the tower be knocked over, unlike incandescent lamps which may break or shatter. The lamp is rated at 10,000+ hours of life providing longer service life than typical halogen lamps. The lamp operates with 120 VAC and is supplied with 100 feet of 16/3 SOOW cord ending in an explosion proof straight blade plug.**Suggested Applications:** include but are not limited to wastewater treatment plants, refinery tanks, oil and gasoline loading docks, coal pulverizing facilities, munitions storage areas, tunnel projects, utility gas plants, power plant areas, hazardous areas and mining conveyor belts.*Cross for Chambers Power Products TL1570MH-120V.*

Made in the USA Quality

1. High Efficiency Metal Halide lamp.
2. 70 Watt Output Comparable to 400W Halogen.
3. Rugged Die Cast Aluminum Lamp Housing.
4. 3/4" Shock Resistant Tempered Glass Lens.

Metal Halide Benefits

1. Long lamp life.
2. High efficiency and low amp draw after initial startup.
3. High durability and reliability.
4. High output and very good color rendering.

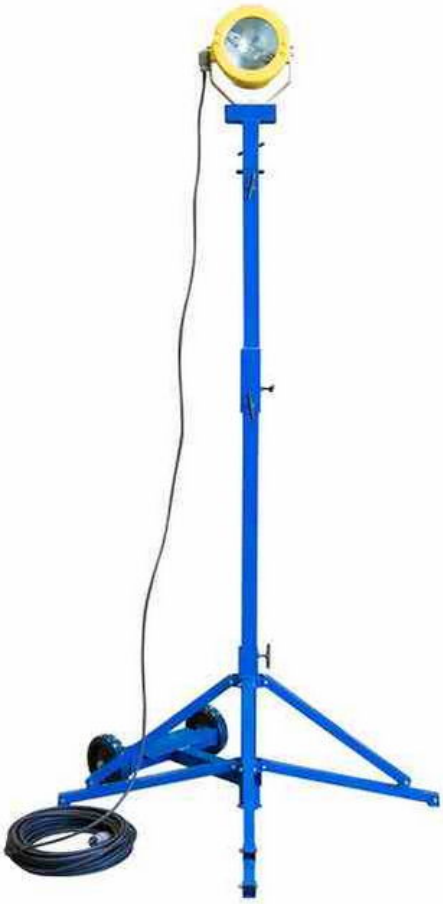

5. Copper Free Shell, Covers and Sealed Fittings.
6. Vibration/Impact Resistant Construction.
7. Low Maintenance.
8. Tripod Adjustable from4 Foot to9 Foot Height.
9. 100 foot 16/3 SOOW Cord.
10. UL Listed for Marine Environments.

5. Vibration and shock resistant.
6. Low maintenance.
