## WALTP-2XWP400MCE

**2, 40-Watt LED Emitters on Industrial Tripod Mount - 120-277VAC - Extends 3.5' to 10' - 100' SOOW Co**

**Product ID: 49752**

**Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).**

**Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.**

**WALTP-2XWP400MCE LED Light Tower**

**Lamp Type: LED**
**Dimensions Each Lamp Only:** W-8 1/2" D-3 1/8" H-6 3/8"
**Deployed (Extended) Dimensions:** 45"-L x 45.3"-W x 132.5"-H
**Deployed (Collapsed) Dimensions:** 45"-L x 45.3"-W x 92.5"-H
**Transport Dimensions:** 81.8"-L x 45"-W x 35.9"-H
**Weight:** 110 lbs.
**Total Lumens:** 2924
**Total Watts:** 80 watts
**Voltage:** 120-277 Volts AC 50/60 Hz
**Amps:** 0.90
**LED Light Color:** Cool White - 7638
**Color Rendering Index:** 79
**Materials:** Aluminum Housing, Polycarbonate Lens
**Lamp Life Expectancy:** 50,000+ Hours
**Mounting:** Telescoping light tower wheeled tripod base 3.5` to 10`
**Wiring:** 50` SOOW cord terminated in straight blade plug
**Lighting Configuration:** Flood Pattern

**WALTP-2XWP400MCE Features**

Waterproof/Vapor Proof
Impact/Vibration Resistant Construction
50,000 Hour LED Life
Extendable Tripod 3.5` to 10`
ETL Approved for Wet Locations
Operates on Standard 120-277 VAC

**Made in the USA**

**The WALTP-2XWP400MCE LED light tower extends from 3.5 feet to 10 feet and provides high intens and telescoping tripod tower versatility for operators looking for an economical yet effective alterna halogen and metal halide light tripods. Each LED emitter on this extendable tripod tower produces**

**illumination comparable to a 400 watt metal halide without the high heat, fragile construction, or hi energy use. Together, these units can cover an area similar to our 400 watt metal halide lights at a f of the cost and energy use.**

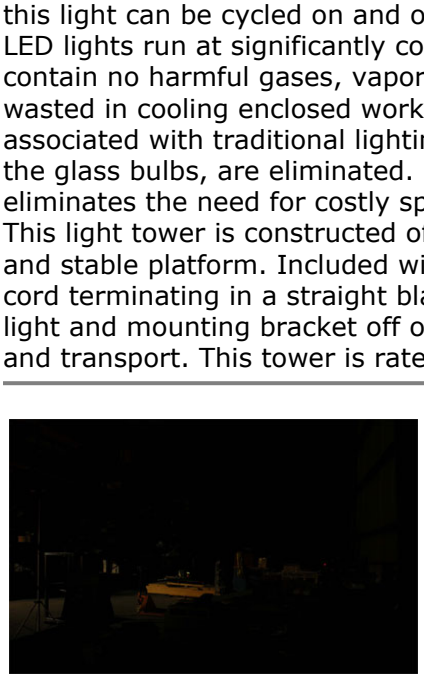

***PLEASE NOTE: ANY FREE SHIPPING OFFERS DO NOT APPLY TO LIGHT MASTS, LIGHT TOWERS, OR QUADPODS***

The WALTP-2XWP400MCE LED light tower from Larson Electronics produces a wide flood beam of light while dra 40 watts @.45 amps at 120 VAC per light head, for a combined total of 80 watts @.90 amps on 120VAC curren light assembly consists of two led light heads, each with twelve 3.3 watt LEDs paired with high purity specular c mounted to a single light fixture bracket. Each of these LED light heads produces a light output comparable to t 400 watt metal halide lamp.

**LED Benefits:** Unlike gas burning and arc type lamps that have glass bulbs, LEDs have no filaments or fragile l to break during operation and/or transportation. Instead of heating a small filament or using a combination of g produce light, light emitting diodes (LEDs) use semi-conductive materials that illuminate when electric current i providing instant illumination with no warm up or cool down time before re-striking. Because there is no warm this light can be cycled on and off with no reduction in lamp life.

LED lights run at significantly cooler temperatures than traditional metal halide and high pressure sodium lights contain no harmful gases, vapors, or mercury, making them both safer and more energy efficient. No extra ene wasted in cooling enclosed work areas due to external heat emissions from bulb type lights, and the operator ri associated with traditional lighting methods, such as accidental burns and exposure to hazardous substances co the glass bulbs, are eliminated. In addition, LEDs are also safer for the environment as they are 100% recyclab eliminates the need for costly special disposal services required with traditional gas burning and arc type lamps

This light tower is constructed of aluminum and provides for both height adjustment and leg placement assurin and stable platform. Included with this unit are two, 40 watt LED lamps and 50 feet of abrasive and oil resistant cord terminating in a straight blade plug. The light fixtures can be removed by releasing the hand knob and slid light and mounting bracket off of the tripod center support while the legs can be collapsed, aiding in deploymen and transport. This tower is rated for use in wet areas and marine environments and operates on 120-277 VAC.

A dark warehouse, lit only by a distant 100W incandescent bulb.

The WALTP-2XWP400MCE lamp fixture consists of two LED light heads mounted atop a telescoping tripod tower light head contains twelve, 3.3 watt LEDs housed within a waterproof aluminum housing that is powder coated durability and resistance to corrosion. These housings incorporate integral cooling fins for efficient heat dissipat increased LED longevity. The LED lamp assemblies are protected by shatterproof polycarbonate lenses which ar to the housings with a waterproof seal. 1/2" waterproof connectors provide a secure and sealed power connecti and rounds out these fixture`s weather resistant construction.

Each of the LED light heads on the WALTP-2XWP400MCE produce a light beam that is longer and narrower than standard Rab Floodzilla 250W Metal Halide (see comparison chart below). The beam will illuminate an area near the distance as a standard 250W metal halide flood light, but is 30% narrower than the metal halide flood.
