

LEDB-VS9

8 Watt Mini LED Strobe Light - Low Profile - 360° Visibility - Multiple Colors

Product ID: 50954

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

LEDB-VS9 Mini LED Strobe Light

Lamp Type: LED

Watts: 8

Dimensions: 1.5"-D x 1.1"-H

Weight: 0.8 lbs

Voltage: 11-30V DC

Amps: 0.67 @ 12V DC - 0.3 @ 24V DC

Light Color: Red, Blue, Amber, White

Mounting: (4) screw holes

Wiring: 15' cable

Temp Range: -30°C – 65°C

Features

(9) High powered LEDs
30 Flash Patterns
Multiple units can be synchronized
Universal Fit
Maintenance free
Easy Installation

The Larson Electronics LEDB-VS9 is a powerful single strobing LED beacon that offers exceptionally brilliant and attention getting light in a small and durable package. This LED beacon works on 11 to 30 volts DC, offers a choice of colors, and provides a universal fit for all vehicles.

The Larson Electronics LEDB-VS9 is available in a choice of red, blue, white, or amber colors and also has 30 different flash patterns to provide more options for department use. This LED beacon measures only 1 1/2 inches in diameter and 1 inch in height making it one of our smallest versatile LED beacons yet. It can be mounted through a 1" hole and secured to a surface with four screws through the black aluminum base. The 8 Watt LED assembly is housed in a polycarbonate

lens cover that is designed to efficiently distribute the flash over a 360 degree radius that is visible several thousand feet farther than competing LED strobes.

Unlike typical beacons, this LED beacon light produces colored illumination without colored lenses or optics that can fade or discolor over time. The LED is solid state and uses no filaments or glass in its construction, resulting in an extremely durable light that can withstand far more abuse than regular filament based beacons. The LEDB-VS9 has a 0.6 amp draw at 13.8 VDC and can be operated with 11 to 30 volt DC current. The unit has a 15 foot cord with power, ground, synch and pattern selection leads.

Suggested Applications: Utility, Construction, Security, Snow Removal, Maintenance, Law Enforcement, Emergency Services, Road Work, Vehicle and Equipment Hazard Lighting
