

EPL-FLA-WG-3

Wire Guard Lens Protector for EPL 3 Lamp Model Fluorescent Explosion Proof Lights

Product ID: 64190

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

Wire Guard Lens Protector for 3 lamp Explosion Proof Fluorescent Lights

2 inch square pattern in aluminum mesh lens cover for the explosion proof fluorescent lights. Each wire guard is secured to the aluminum housing on the EPL-48-3L fluorescent and LED series, protecting the Pyrex enclosure tubes from accidental damage. Each wire guard protects a single 3 lamp fixture. This wire guard will not work for the EPL-48-2L or EPL-48-4L series requires 2 lamp mesh guards.

In our design, the Pyrex tubes are sealed to the aluminum housing. The T-series fluorescent or LED tube lights are sealed within the enclosure created between the aluminum housing and the Pyrex tubes. In applications, where operators may come into contact with the light fixture, wire guards can prevent tools or other objects from damaging the Pyrex tubes.
