

LM-SB

Swiveling Base for LM series Telescoping Light Masts

Product ID: 64240

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

This swiveling base is designed to rotate very heavy loads in excess of several thousand pounds. This unit works the same as a conventional 'Lazy Susan' as it simply rotates in place. Equipped with $\frac{3}{4}$ inch steel mounting plates on the top and the bottom, this rotating base can be attached to any surface via the $\frac{3}{4}$ inch bolt holes in the top and bottom mount plate. The top and bottom mounting plate measure 12 inches square.
