

**Golight Radioray and Stryker LED Flood Lens Kit - Removable Flood Lens**Part #: [GL-LED-FLK](#)

**The GL-LED-FLK is the Golight LED flood lens kit. This assembly includes a snap on/off flood lens. Once installed, this enables the operator to have a removable "snap on" diffuser lens for the Golight Radioray and Golight Stryker LED models.**

If you purchase this flood lens kit with a Golight model on [www.larsonelectronics.com](http://www.larsonelectronics.com) we will automatically install the flood lens kit for you. If you purchase it separately, then you will need to install it yourself with instructions provided.

There are two tabs on each side of the lens. Repeat the process in reverse to apply the flood lens. Be careful not push hard on the lens assembly or you will move the position of the lamp holder assembly in the rear gear which could limit the range of the upward and downward movement of the lamp.

This diffuser flood lens will shorten and widen the spot beam for wide area illumination of distances to 100 feet.

Part #: [GL-LED-FLK \(69974\)](#)
