

Post mount spotlight - 6 inch - 35W HID - Driver side WITH install kit**Post mount spotlight - 6 inch - 35W HID - Driver side WITH install kit**

Operation: Operator controls rotation and elevation of spotlight outside of vehicle by twisting and turning a handle on the inside of the vehicle. Operator remains protected from the elements and can position the beam quickly and easily. The beam remains where the operator places it until the handle is moved.

Format: 6 inch round spun steel housing with triple plate chrome finish.

Colors: Available with Chrome housing – black housing and shaft upgrade available under accessories for an additional fee (shaft is chrome and handle is black)

Shaft: Stainless steel with triple plate chrome coating

Handle: Black rubberized handle

Switch: Thumb activated toggle on the top rear of the handle

Voltage: 12 Volt, 35 Watt configuration. Check accessories for 24 volt availability.

Lens Type: Sealed beam – glass lens

Beam Type: Spot beam

Beam Length: 2800 feet projection with 3200 lumens

Bulb Type: 35 Watt HID (High Intensity Discharge lamp)

Candlepower: Industrial candlepower – 600,000 Retail Candlepower: 15 million [Click here for more information on industrial and retail candlepower ratings](#)

Electrical: Single positive lead from handle connects to vehicle power. Spotlight is grounded via mounting kit to vehicle chassis.

Separated connection stems from back of the housing to separate ballast unit. Ballast is mounted separately.

Amp draw: 3 amps on 12 volts. 14 amps to start for 60 seconds.

More Information: More information on Unity Post Mount Spotlight - 6 inch with 35 Watt HID bulb

Mounting options include (depends on year, make and model of vehicle, see product description for specific mounting location):

Post mount spotlights are the most common installation options, with the mounting going through the A-pillar running alongside the windshield. The A-pillar is the metal frame on the side of the windshield.

Inside post mount spotlights are common in late model vehicles, but the installation requires more time as one must drill through the A-pillar and cut a small notch in the forward window support of the door. Both inside post mount lights and post mount lights are mounted in the A-pillar. The difference is the angle of the light.

Door mount lights are mounted in the door. The door mount spotlight is an easy installation but the spotlight will move with the door when the door is opened and closed. While this isn't suitable for most police patrol cars, most other operators find the door mount acceptable. In many cases, a particular make and model vehicle will not have a post mount spotlight option because the A-pillar is too small, but usually these vehicles have a door mount and a inside post mount option. Please click here to see pictures of the different mounting positions.
