HID-22SL-15M-REM-105

Replacement 1500 Watt Metal Halide Light Head - No Ballast, No Bulb

Product ID: 105485

Image: HID-22SL-15M-REM-105

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

HID-22SL-15M-REM-105 1500 Watt Metal Halide Light Head

Lamp Type: Metal Halide
Dimensions: 19" - Diameter (Light Head) 23" H
Watts: 1500 total
Voltage: 120-277 Volts AC or 480 Volts AC
Lighting Configuration: Flood
Mounting: One Bolt Mounting
Wiring: 6` Cord w/pigtail
Lens Material: Tempered Glass Lens
Housing Material: Die-Cast Aluminum Housing
Weight: 12 lbs-

Features

U.L. Rated
Operates on 120-277 Volts AC or 480 Volts AC
Powder Coated for Corrosion Resistance
50,000 Hour LED Life
Vertical and Horizontal Aim
Heavy Duty 6` Power Cord
Light Head Only

Made in the USA

The HID-22SL-15M-REM-105 from Larson Electronics is a replacement 1500 Watt Metal Halide Light Head with no ballast and provides operators with the intensity and exceptional color rendering of a metal halide lamp in a unit that is safe for ground

mounting and use in wet areas.

The HID-22SL-15M-REM-105 1500 watt metal halide light produces exceptional illumination using a 19” aluminum reflector housing that spreads a powerful flood pattern of high quality light over large areas. This fixture is for use with a 1500 watt metal halide lamp which produces the intense illumination and exceptional color rendering normally associated with these lamps. Bulb sold separately. The metal halide lamp is secured within a separate die cast housing for strength and durability while a clear tempered glass lens provides protection for the lamp. The unit is the light head only, no remote ballast or bulb included, but both are available for purchase separately. This fixture is U.L. listed for wet area certification and the high power flood beam produced by this lamp makes it ideal for applications requiring illumination of large scale areas that may be subject to wet conditions.

The 19” reflector on this lamp is constructed of aluminum with a clear tempered glass lens which is hinged onto the reflector and secured into place with a four point latching system. The lamp socket is die cast aluminum and separate from the reflector for added durability. The reflector and lamp socket assembly are secured together as one unit which makes installation simple and straightforward. Vertical and horizontal aiming guides are included in this lamps design which makes aiming this lamp during operation easier and safer, protecting users from the potential burns associated with handling operating metal halide lamp fixtures. A stainless steel hinge provides durable adjustability and corrosion resistance. This lamp comes prewired with a six foot cord and is U.L. rated for wet areas and ground mounting.

Suggested Applications: Include but not limited to Stadiums, Speedways, Storage Areas, Public Parks and Mobile Lighting.
