

TPM-12-V2

Telescoping Light Pole - Adjustable - 3 Feet to 8.5 Feet - Bottom Mounting Bracket Included

Product ID: 144165

Image: TPM-12-V2

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

TPM-12-V2 Telescoping Aluminum Pole

Type: Telescoping equipment/light pole
Dimensions: 5"-W x 3.016"-D x 6.0"-H
Weight: 3 lbs
Materials: Aluminum
Weight Capacity: 100 Pounds
Mounting: Bracket for Equipment/Light Mounting

Features

CNC Machined Precision Parts
Lightweight Design
Air Cushioned Chamber Prevents Equipment Damage
Self-Locking Collar
No Tools Required to Adjust

The TPM-12-V2 from Larson Electronics is a telescoping pole to raise equipment above a work site or other environment. The "magic" telescoping pole is constructed from lightweight and heavy-duty aluminum and features CNC machined precision parts. This telescoping aluminum pole automatically locks into place at any height as the operator raises it with no tools required. The telescoping pole stands 3 feet tall when fully closed and can reach heights up to 8 feet when fully extended.

Pole Features: The TPM-12-V2 can easily support weights of 100 pounds when fully extended

which gives the pole the versatility to hold a wide variety of equipment. Any equipment mounted on this aluminum telescoping pole will not become damaged thanks to the air cushioned chamber. The chamber provides a slow and controlled descent of the pole even with heavy equipment or lighting attached. Harsh drops cannot happen even if the operator accidentally lets go of the pole during the lowering process. The lowering process on this telescoping aluminum pole is easy. The operator simply lifts up on the self-locking collar and allows the sections of pole to lower into the unit.

The self-locking collar also enables the pole to be extended and remain in the desired position without ever tightening the collar. The bracket on top of the TPM-12-V2 is ideal for mounting permanent mount lights. The convenient maximum height of the aluminum telescoping pole allows for mounted lights to provide maximum area illumination. The TPM-12-V2 also comes with a mounting bracket for the pole itself. The mounting bracket can be attached to a wall, trailer, boat cockpit or other flat surfaces. The pole itself can then be easily inserted into the bracket for operation of pole-mounted devices and then just as easily removed for storage and transportation.

This adjustable mounting pole is ideal for boats as operators can mount this next to the console and elevate lights up to illuminate the boat and the surrounding area. By elevating the lights this high, they can eliminate casting and glare while better illuminating a larger area. Essentially, this adjustable pole provides the benefits of having a mast mounted light without actually having a mast. Once the lights are no longer needed, the pole can be collapsed down and the lights secured before getting underway. Similarly, these poles are ideal for attaching lights to trailers. Operators can park the trailer, extend the lights to their maximum height, and illuminate a large area around the trailer. Once finished with their use, the pole is simply collapsed and the lights stowed for travel. This is a highly convenient setup for those who manage events and gatherings where trailers are used as portable operations areas.

Industrial Aluminum Pole - Extends from 3 to 8 feet. Bracket on top for mounting permanent mount lights. Self-locking collar enables the pole to be extended and remain its position. Air-cushioned. 35lb. capacity.
