EYM-2

2" EYM-Seal off to use with CGB to seal off wiring to explosion proof lights

Product ID: 144639

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

2” Explosion proof seal off is used to make a junction between an explosion proof lights and rigid pipe. Typically, users will make their connections, keep the conductors separate and pour chico into the seal off.
