

PTB-1

Remote Controlled Pan Tilt Base Rotates and Tilts with Mounting Plate

Product ID: 1457

Image: PTB-1

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

PTB-1 Pan/Tilt Base

Dimensions: 18.79" x 19.4" x 14.79"

Weight: 24 lbs

Voltage: 12V or 24V DC

Rotation: 0° to 355°

Tilt: -60° to +30°

Pan Speed: 12°/Sec

Tilt Speed: 6°/Sec

Pan Electrical Power: 6 Watts

Tilt Electrical Power: 15 Watts

Maximum Load: 65 lbs

Maximum Torque: 468.68 lbf-in

Ambient Operating Temp Range: -25° C to +50°C

Ingress Protection: IP54

Housing Material: Die-Cast Aluminum

Finish: Powder Coated - Black

Mounting: 4-Corner Thru-Hole

Remote: Hard wired & wireless

Wiring: 25' Cable w/ Inline Remote - (2) 1' Pigtails

Features/Ratings

Pelco-D Protocol

The PTB-1 industrial grade pan tilt base is designed to provide wireless and hard wired remote control of lights and equipment. This remote control unit allows operators to rotate through from 0° to 355°, tilt from -60° to +30°, and mount equipment weighing up to 65lbs.

The PTB-1 pan/tilt base provides operators with a remote way to control lights, cameras, and other

equipment mounted to the base. An 8" by 10" mounting plate allows operators to mount a variety of user provided equipment to the top of the pan/tilt base, including LED and HID lights, cameras, and antennas. Wired and wireless remote controls are provided with this unit, providing flexibility in the field.

This unit is constructed of die-cast aluminum and powder coated for added corrosion resistance. The internal gears of the PTB-1 provide no slip and no "slop" during operation, and the pan/tilt base holds its position after movement has stopped. Mounting is provided via four-corner thru-holes. This pan/tilt base will keep its position during storms and strong winds, and holds up to vibrations in vehicle and offshore applications.

The PTB-1 is configured for remote software control via Pelco-D protocol. This allows operators to control the pan and tilt this unit from a computer control station.

Hard wired and wireless remote controls are both included with the PTB-1. The wireless remote control is operated from the wireless key fob, is battery operated, and controls up, down, left, right, and on/off. The hard wired remote provides 25' of cable with an Am phenol 10-SL waterproof disconnect at the base of the fixture. The handheld wired remote is located 15' from the light, with a 10' from the light leading to the power source. Two individual +/- leads on the pan/tilt base allow operators to power user provided equipment from the same power source without running additional cabling. The PTB-1 is offered in 12V or 24V DC.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
