

GCP-RPS-DL-4X-LED-WC

Indoor LED Track Light w/ Remote Control - (4) Track Heads - Dimmable, Adjustable - Dual Power

Product ID: 147406

Image: GCP-RPS-DL-4X-LED-WC

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

GCP-RPS-DL-4X-LED-WC Indoor LED Track Light

Lamp Type: LED

Dimensions: 18.5" x 2.25" x 6.875"

Weight: 3 lbs

Total Watts: .35

Voltage: 120V AC

Lumens: 200

LED Light Color: White

Kelvin Color Temperature: 3,000K

Color Rendering Index: 73

LED Life Expectancy: 50,000+ hours

Ambient Operating Temp Range: -40°C to +50°C

Remote Control/Range: Yes, 15' Range

Power Options: (6) AAA Batteries or AC Adapter (Included)

Material: Plastic

Mount: Surface or Wall

Wiring: 5' AC Power Cord

Color: White

The GCP-RPS-DL-4X-LED-WC LED Track Light offers compact lighting for indoor spaces, such as cabinets, kitchens and displays. This remote controlled unit may be powered using six AAA batteries or using an included AC adapter (120V AC) with a five-

foot cord. Featuring four adjustable track heads, the LED light is dimmable and can be mounted on compatible surfaces and walls.

The GCP-RPS-DL-4X-LED-WC is a slim LED light for tight indoor spaces, making it suitable for shelves, closets and cabinets. The unit contains four adjustable LED track heads that are dimmable. When in use, the luminary consumes .35 watts and produces 200 lumens of white light with a color temperature of 3,000K. Operators may control the light using a remote from distances up to 15 feet. Power options for the unit include the following: (6) AAA batteries or AC adapter (120V AC). The AC power cord measures five feet. This LED light's housing is constructed of plastic.

LED Benefits: Unlike gas burning and arc type lamps that have glass bulbs, LEDs have no filaments or fragile housings to break during operation and/or transportation. Instead of heating a small filament or using a combination of gases to produce light, light emitting diodes (LEDs) use semi-conductive materials that illuminate when electric current is applied, providing instant illumination with no warm up or cool down time before re-striking. Because there is no warm up period, this light can be cycled on and off with no reduction in lamp life.

LED lights run at significantly cooler temperatures than traditional metal halide and high pressure sodium lights and contain no harmful gases, vapors, or mercury, making them both safer and more energy efficient. No extra energy is wasted in cooling enclosed work areas due to external heat emissions from bulb type lights, and the operator risks associated with traditional lighting methods, such as accidental burns and exposure to hazardous substances contained in the glass bulbs, are eliminated. In addition, LEDs are also safer for the environment as they are 100% recyclable, which eliminates the need for costly special disposal services required with traditional gas burning and arc type lamps.

Applications: Indoor spaces, cabinets, office spaces, art displays, drawers, kitchens, workshops, residential spaces, indoor events, shelves and more.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
