EPF-30P-D25

Static Conductive Duct for EPF-30P Explosion Proof Fan / Blower - 12" OD by 25 feet

Product ID: 1848

Image: EPF-30P-D25

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

Explosion Proof Fan Duct - 25 foot Static Conductive Duct Fan Redirects Stale Air From Hazardous Location Areas

Hazardous location areas require a static conductive duct (12 inches outside diameter X 25 feet). Static conductive duct lengths are connected via aluminum couplers. You will need an aluminum coupler to connect 2 pieces of duct.

The duct consists of a single-ply polyester reinforced PVC vinyl fabric hose contruction with an extrernal wearstrip reinforced with a spring steel wire helix. It is lightweight for blower applications and highly compressible. The retractability of the static conductive duct allows for convenient storage and easy transport in a fraction of its fully extended length and has low friction loss. The wearstrip offers external abrasion resistance, and is listed as YL 94 V-0 flame retardant. Ambient temperature ranges from -20 degrees to 180 degrees Farenheit.
