

PMB-4X4

Permanent Mounting Plate with Swiveling & Tilting Bracket - Stud Mount

Product ID: 1938

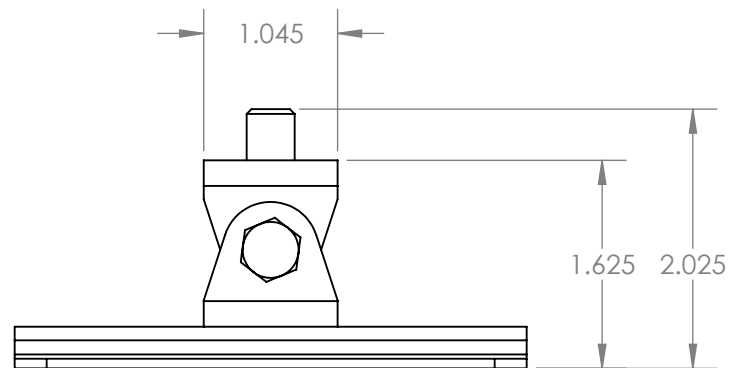

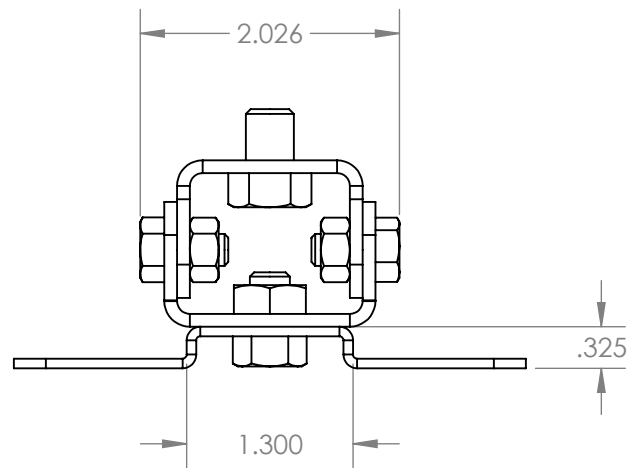

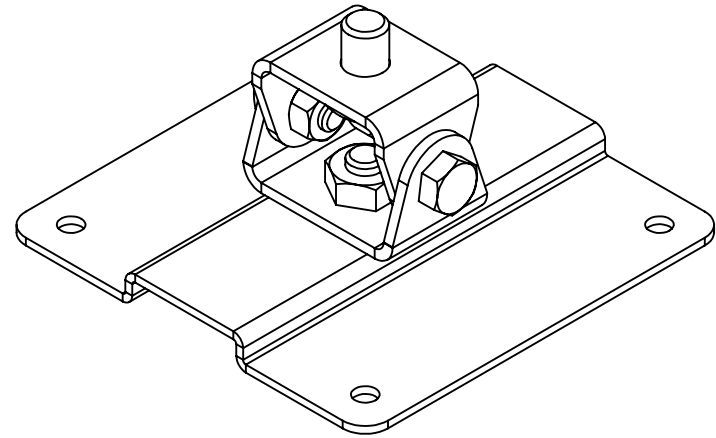

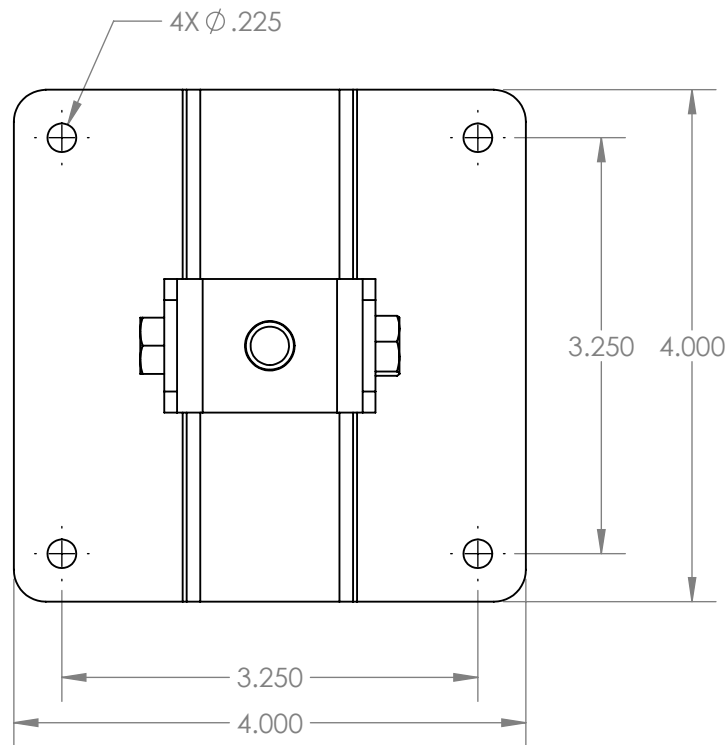

Image: PMB-4X4

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

Permanent Mounting Base with 4 inch square plate with 4 corner holes. The 4 corner holes enable the operator to permanently bolt down the powder coated, steel plate. The stud on top of the swiveling, tilting brackets can be threaded into various lighting products, binoculars, cameras and other equipment that can be tripod mounted. Base swivels 360 degrees and tilts 140 degrees via tension hinge. The base may be strong enough to serve as a base stand for well balanced, smaller equipment.

The 3/8-16 stud is compatible with Koehler Brightstar Nitetracker spotlights, including RC-3800, RC-1100N, XL-1800C and XL-1000C spotlights. It is also compatible with the Larson Electronics HL-8 and RL-8 spotlights. This magnetic base can be screwed on in the field without the use of any tools.
