MM-5

MM5 Magnetic Base w/ 200 lb of Magnetic Grip for Spotlights, Cameras, Binoculars, GPS Systems

Product ID: 196

Image: MM-5

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

The MM-5 from Larson Electronics is a Magnetic Base that can be used to add magnetic mounting capabilities to cameras, binoculars, spotting scopes, GPS units, and more.

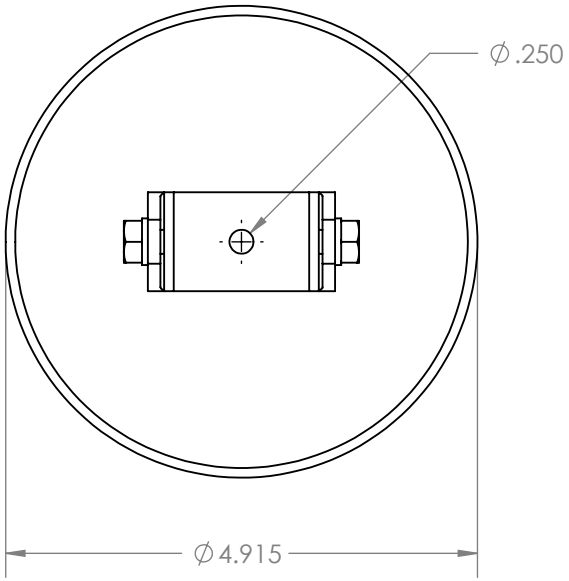

The MM-5 magnetic base features a 5.00" diameter magnetic base that has a 200 lb grip capacity. The base swivels 360° and can tilt up to 140° for custom positioning and adjustment. The MM-5 screws onto the tripod base of many different spotlights, cameras, binoculars, and other electronic devices. This magnetic base is heavy enough that it can hold the spotlight at any angle on a flat surface, even if the surface does not attract a magnetic charge. In other words, this magnetic base can hold a spotlight at any angle on just a regular table, etc.

The top mounting bracket on the MM-5 has a pressed in 3/8-16 X 3/4 inch stud or pressed in 1/4-20 stud. Please make your selection when ordering. The 3/8-16 stud is compatible with the Larson Electronics HL-85 and RL-85 series spotlights. This magnetic base can be screwed on in the field without the use of any tools. The 1/4-20 stud is compatible with all cameras, binoculars and most photography and video related devices. The 1/4-20 stud is the standard mounting solution for all small electronics. Thus, this base can be used with almost any camera, video camera, GPS system, binoculars, monoculars, etc.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
