LEDWH-100

100' LED Wiring Harness - Deutsche Connector and Tinned Leads

Product ID: 224511

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

The LEDWH-100 from Larson Electronics is a one hundred (100`) foot wiring harness for the LEDLB, LED10W, LEDP3W, and LEDP10W Series LED Spotlights. The unit contains a male deutsche connector on one end and tinned negative (-) and positive (+) leads on the other. Operator has but to connect the LED light to the male deutsche connector, take the tinned leads and connect those to your low voltage power source, and the LED unit receives power.
