

TPM-BM-12-V2-WMC

Telescoping Adjustable Pole - 3' to 8' - Base/Ground Mount - Removable Clips

Product ID: 265226

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

TPM-BM-12-V2-WMC Telescoping Industrial Pole

Type: Telescoping Equipment Pole

Dimensions: Extends from 3' to 8'

Weight: 5 lbs

Equipment Mount (Top): 6.5" x 6.5"

Materials: Aluminum

Weight Capacity: 100 Pounds

Base Mount (Bottom): 6.5" x 6.5" Ground Mount

Wire Management: Removable Clips

Features

CNC Machined Precision Parts

Lightweight Design

Air Cushioned Chamber Prevents Equipment Damage

Self-Locking Collar

No Tools Required to Adjust

The TPM-BM-12-V2-WMC from Larson Electronics is a Telescoping Industrial Pole for temporary mounting of portable equipment above a work site or other environments. The "magic" telescoping pole is constructed from lightweight and heavy-duty aluminum and features CNC machined precision parts. This telescoping aluminum pole automatically locks into place at any height as the operator raises it with no tools required. The unit stands 3 feet tall when fully closed and can reach heights up to 8 feet when fully extended.

Pole Features: The TPM-BM-12-V2-WMC can easily support up to 100 pounds when fully extended which allows it to securely hold a wide range of portable equipment. An air cushioned chamber provides a slow, controlled descent of the

pole even with heavy equipment or lighting attached. Harsh drops cannot happen even if the operator accidentally releases the pole during the lowering process. The lowering process on this telescoping aluminum pole is easy. The operator simply lifts up the self-locking collar and allows the sections of pole to lower into the unit.

This model features a 6.5" x 6.5" base at the bottom for ground mounting applications. The top of the pole contains a 6.5" x 6.5" component for mounting equipment. Operators may access removable clips for seamless wire management. This adjustable mounting pole is ideal for boats as operators can mount this next to the console and elevate lights up to illuminate the boat and the surrounding area. By elevating the lights this high, they can eliminate casting and glare while better illuminating a larger area. Essentially, this adjustable pole provides the benefits of having a mast mounted light without actually having a mast. Once the lights are no longer needed, the pole can be collapsed down and the lights secured before getting underway. Similarly, these poles are ideal for attaching lights to trailers. Operators can park the trailer, extend the lights to their maximum height, and illuminate a large area around the trailer.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
