WDL-SS-12-70W-LED-TRN

22W Stainless Steel Wash Down LED Light - 120/277V AC - NSF Food Safe Compliant - IP66 Rated - Trunnion Mount

Product ID: 273034

Image: WDL-SS-12-70W-LED-TRN

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

WDL-SS-12-70W-LED-TRN Stainless Steel Wash Down LED Fixture
Lamp Type: LED
Dimensions: 13"-L x 9.5"-W x 6.75"-H
Driver: Dimmable Electronic Driver
Total Watts: 22W
Voltage: 120-277 V AC @ 50/60 Hz
Lumens: 3,126 (5000K) 3,001 (4000K)
LED Light Color: White
Correlated Color Temperature: 5000K and 4000K
Color Rendering Index: 80+
LED Life Expectancy: 50,000+ hours
Ambient Operating Temp Range: -40°C to +50°C
Housing Material: Aluminum Housing, Stainless Steel Trunnion
Finish: Natural Finish
Lens Material: Clear Polycarbonate
Mount: Stainless Steel Trunnion Mount

Ratings/Approvals
IP66 Waterproof
Listed for Wet Locations
NSF Food Safe Compliant

This WDL-SS-12-70W-LED-TRN Stainless Steel Wash Down LED Fixture offers 3,126 lumens of crisp white light with a CRI of 80 and a color temperature of 5000K. This NSF Food Safe Compliant unit contains impact and shock resistant, no-glass polycarbonate LED bulbs, and sealed and corrosion resistant aluminum hardware, providing reliable, stable lighting under even the harshest of conditions in food processing and preparation applications. This 22-watt LED light operates on 120-277 V AC @ 50/60 Hz,

and features a dimmable electronic driver and IP66 waterproof protection.

The WDL-SS-12-70W-LED-TRN linear wash down light is a NSF Food Safe Compliant, food safe fixture, and a direct replacement for 70 watt metal halide or pressure sodium lights. This 22 watt LED light fixture is ideal for both indoor and outdoor use and is approved for wet locations including high pressure hose down areas. This cast aluminum LED fixture is NSF Food Safe Compliant food equipment and operates on voltages ranging from 120-277 V AC at 50/60 Hz. A special heat dissipating design in conjunction with the advanced dimmable LED driver technology helps this fixture achieve an excellent rated lifespan and lumen retention.

The housing on this LED unit is made of heavy-duty, corrosion resistant, die cast stainless steel with a naturala finish for a more durable option than metal halide units. Instead of using a fragile glass bulbs, as with traditional fixtures, this light is equipped with tough, shatter resistant LEDs sealed in an unbreakable polycarbonate lens, making this wash down light ideal for food preparation applications. Just 6.75" in height, this self-contained trunnion-mounted wash down light is low profile, and provides instant full power illumination, projecting stable, no-flicker beam from a durable solid-state lighting source. This rugged hose down light is IP66 rated, able to withstand the powerful high-pressure jets used regularly during food preparation and sanitation operation, and is built to operate in extreme temperatures between -40°C to +50°C.

LED Drivers: Even in LED fixtures, heat is the single largest factor in premature light failure and color shifting. As a result, many manufacturers reduce the output of their LEDs in order to reduce the amount of heat produced. Rather than lower light output or quality, Larson Electronics addresses this problem with the addition of an electronic LED driver. This internal driver provides the ability to automatically monitor and adjust input current to maintain the correct LED voltage levels regardless of input levels across a specific range. This not only reduces the energy dissipation, effectively lowering the operating temperature of the fixture, but also prevents AC over-voltage and short circuit loading making this fixture virtually maintenance free. Because the electronic driver allows the WDL-SS-12-70W-LED-TRN to run at a cooler internal temperature and regulates the electrical current, energy efficiency and LED service hours are maximized while at the same time reducing operating costs and downtime incurred from the frequent servicing intervals required with other hotter running lights.

LED Benefits: Unlike gas burning and arc type lamps that have glass bulbs, LEDs have no filaments or fragile housings to break during operation and/or transportation. Instead of heating a small filament or using a combination of gases to produce light, light emitting diodes (LEDs) use semi-conductive materials that illuminate when electric current is applied, providing instant illumination with no warm up or cool down time before re-striking. Because there is no warm up period, this light can be cycled on and off with no reduction in lamp life.

LED lights run at significantly cooler temperatures than traditional metal halide and high pressure sodium lights and contain no harmful gases, vapors, or mercury, making them both safer and more energy efficient. No extra energy is wasted in cooling enclosed work areas due to external heat emissions from bulb type lights, and the operator risks associated with traditional lighting methods, such as accidental burns and exposure to hazardous substances contained in the glass bulbs, are eliminated. In addition, LEDs are also safer for the environment as they are 100% recyclable, which eliminates the need for costly special

disposal services required with traditional gas burning and arc type lamps.

Mounting: The WDL-SS-12-70W-LED-TRN is trunnion mounted with a stamped heavy-duty stainless steel yoke, with a powder coated finish and included hardware for safe and easy mounting.

Applications: Food Processing and Preparation, Automation, Washdown lighting, Inspection. NSF certification meets the requirements for Food Processing Facilities.

At Larson Electronics, we do more than meet your lighting needs. We also provide replacement, retrofit, and upgrade parts as well as industrial grade power accessories. Our craftsmen can custom build any lighting system and/or accessories to fit the unique demands of your operation. A commitment to honesty, quality, and dependability has made Larson Electronics a leader in the lighting and electronics business since 1973. Contact us today at 800-369-6671 or message sales@larsonelectronics.com for more information about our custom options tailored to meet your specific industry needs.
