The Larson Electronics MT-LAVR-1P-120V-0.5KVA-120V-N1 Industrial Automatic Voltage Stabilizer is designed for industrial and commercial locations. The 0.5 KVA power device comes with an input voltage/frequency of single-phase 120V (fluctuating), 60 Hz and an output voltage/frequency of single-phase 120V (stable), 60 Hz. This unit is mobile via four wheels at the bottom of the enclosure.

This 0.5 KVA unit accepts single-phase 120V AC (fluctuating) 60Hz on the input side (H1 and H2) and provides single-phase 120V AC (stable) 60Hz on the output side (X1 and X2). There is a delay of 5 seconds when starting the device and an adjust time of 1 second. This power unit is equipped with several protective features, including overload, short circuit and over temperature. An LCD display located at the front of the voltage stabilizer provides the status of protective features and various real-time indicators, such as input/output voltage, fault indication, delay time and more. The enclosure that houses the voltage stabilizer features vents to promote active cooling during use.

Mounting: The MT-LAVR-1P-120V-0.5KVA-120V-N1 is secured inside a mobile enclosure with wheels for seamless mobility around the work site.

Applications: Industrial facilities, laboratories, air compressor testing, power supply testing, motor equipment testing, quality assurance, lighting systems and more.
