MT-PML-XX-SP9686

Nitrogen Sampling Valve for Oil-Filled Transformers – 1/4" NPT – Brass/Stainless Steel

Product ID: 334891

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

The MT-PML-XX-SP9686 from Larson Electronics is a Nitrogen Sampling Valve designed for use with oil-immersed transformers equipped with nitrogen blanket systems.

The MT-PML-XX-SP9686 is used to safely extract gas samples from the transformer tank headspace for monitoring and analysis, while maintaining a secure, leak-proof seal within the system.

Larson Electronics is a manufacturer and as such can build stationary and portable transformer systems to your specifications. Although we carry several models of power distribution transformer systems, we can deliver custom ordered units almost as quickly as our prebuilt units. If this model does not meet your needs, please contact us at 1-800-369-6671 or sales@larsonelectronics.com to discuss your specific requirements.
