The Larson Electronics MTPC-SCHD-230V-1P-6HP-3P Static Phase Converter is designed to convert single-phase power to three-phase power. This unit accepts a single-phase input range of 230V and provides a three-phase output range of 230V. Operators may use this phase converter to power machines that require three-phase power in locations where only single-phase power is available.

The MTPC-SCHD-230V-1P-6HP-3P static phase converter is suitable for converting single-phase

power to three-phase power at 230V (input/output). This 6 HP unit accepts a single-phase input range of 230V. After conversion, three-phase 230V power is provided on the output side. A single-phase neutral wire is not needed to use the phase converter.

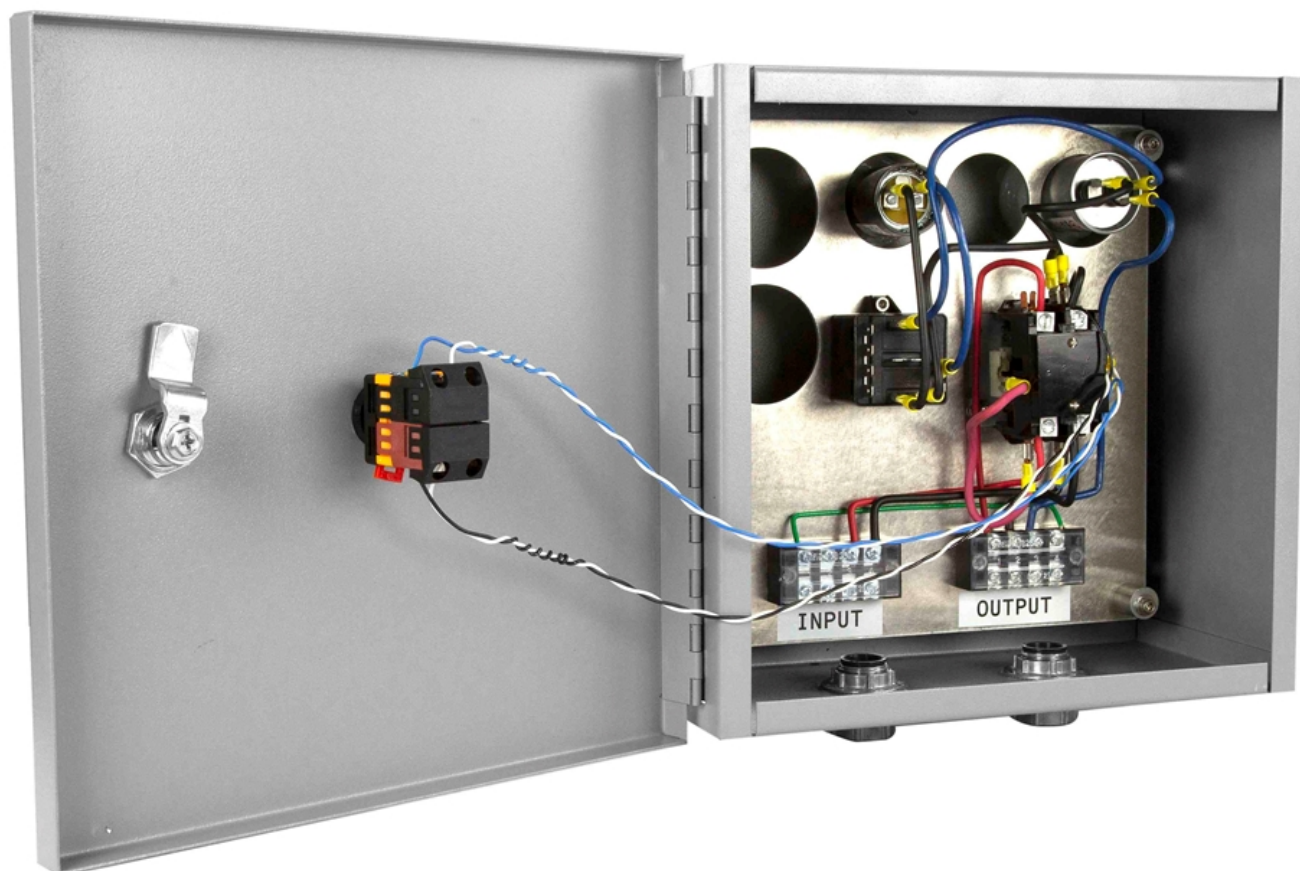

The MTPC-SCHD-230V-1P-6HP-3P is housed in a metallic enclosure for protection in work sites. Recommended for indoor/dry use, the phase converter should not be installed in wet or damp locations and in areas that experience constant vibration.

Mounting: The static phase converter can be mounted on surfaces or walls via four mounting holes located at the back of the unit. For best results, the device should be mounted vertically, with the conduit box at the top.

Applications: Lathes, Mills, Grinders, Drills, Saws, Metal working and Woodworking equipment, Printing Machines, Elevator Belts and more.
