**Transformer Features:** With a transformer rating of 30 kVA, the MT-ISX-3P-400Y-30KVA-208D-N3R-50.60HZ isolation transformer is a three phase unit with a primary voltage of 400 V Wye. It also provides a secondary voltage of 208 V Delta. Featuring robust construction, this unit's cores are manufactured with non-aging, cold-rolled silicon steel laminations using state of the art technology.

This 50Hz unit boasts a low cost of ownership and is highly energy efficient. Lower heat emissions mean less cooling is needed as well. The Standard Type 3R enclosure makes the unit suitable for both indoor and outdoor applications and it can be floor mounted. The unit also features 220° insulation with a 150°C temperature rise.

**Benefits:** The MT-ISX-3P-400Y-30KVA-208D-N3R-50.60HZ general purpose 50/60 Hz transformer offers many benefits to the consumer. Precision cut aluminum transformer winding material help to improve performance. The close tolerances used during manufacturing also eliminates burrs which hinder performance. Each core is specially coated to prevent the ingress of moisture and are electrically balanced to minimize axial forces during short circuit situations.

This 50 Hz isolation transformer provides owners with significant energy savings as well as offering environmental benefits. Higher efficiency not only extends the life of the transformer, but also turn into cost savings for owners in the form of lower energy bills and decreased cost of ownership. Integrated floor mounting brackets make installation fast and easy and the offset outward facing floor installation holes allow for easy power tool access.

**Safety:** The MT-ISX-3P-400Y-30KVA-208D-N3R-50.60HZ is an isolation transformer which means that it provides operators with an increased level of protection against electric shock. An isolation transformer can also suppress electrical noise in sensitive devices and transfer power between two circuits which must not be connected. The MT-ISX-3P-400Y-30KVA-208D-N3R-50.60HZ achieves these safety features by separating or "isolating" the powered device from the power source and insulation between the primary and secondary power sources.

**Applications:** General purposes.
