

## LED-ALB

LEDLB, LED10W - Adjustable Locking Base

Product ID: 45366

Image: LED-ALB

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

The LED-ALB is designed to mount the Larson Electronics LEDLB and LED10W series LED lights. The operator can attach the LED lights to the top plate. A series of index holes on the top and side enable the operator to adjust the angle of the light. Spring loaded Pem studs can be pulled back and dropped into another index hole to change the pan and tilt configuration. Changes can be made easily with no tools. Once the position of the beam is established, no amount of vibration will alter the position. The LED-ALB is made from aluminum and powder coated white or black.

**3 year warranty replacement on this LED light (or LED bulbs for light fixtures with removable LED bulbs). After 30 days, the customer ships the failed LED light and/or LED bulb to Larson Electronics at their expense. If the failure is a manufacturer defect, we will ship a new replacement to the customer. If failure occurs within 30 days of receipt, Larson Electronics will provide a return label via email to the customer. When the failed light is returned, Larson Electronics will ship a new replacement.**
