T8 to T5HO Converter Socket - Allows T8 Socket to accept a T5HO Fluorescent Bulb

Product ID: 48702

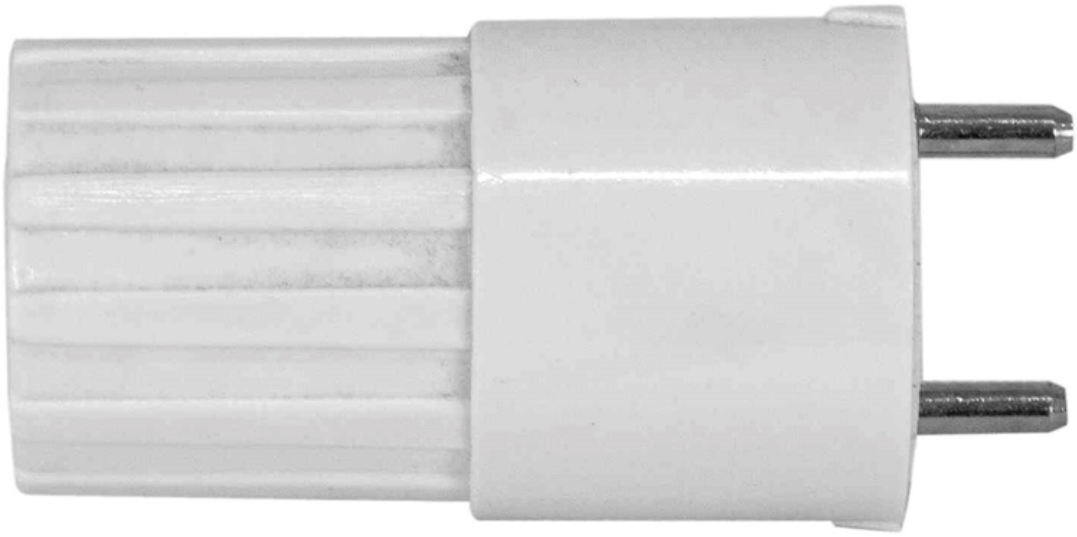

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

T8 to T5HO Socket Converter. Ten sockets included with each order.

In order for the T5HO to function, operator must first change out the T8 ballast to a T5HO ballast ad use these sockets to mount the T5HO bulb in the standard T8 socket. The pin configuration is for a T8 socket and inside the socket you can fit a T5HO bulb.

This is a very inexpensive option to consider when changing over from the old T8 fluorescent to the newer, more efficient T5HO configuration.
