HUL-18-RRL

Removeable Red Hunting Lens for the HUL-18 and HUL-18-HID Handheld Spotlights - Adhesive

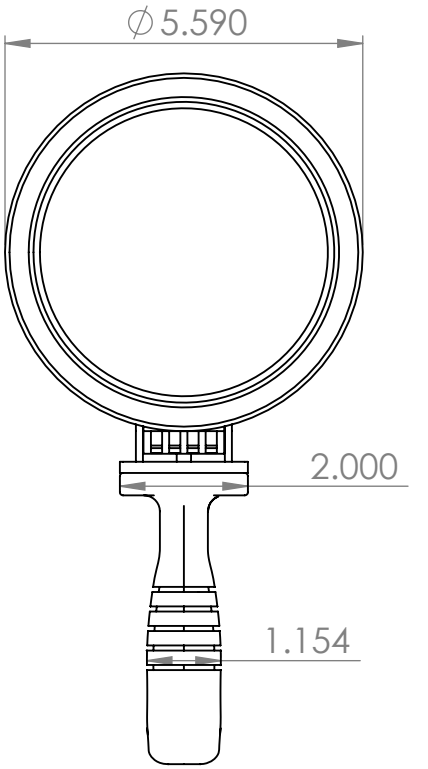

Product ID: 49709

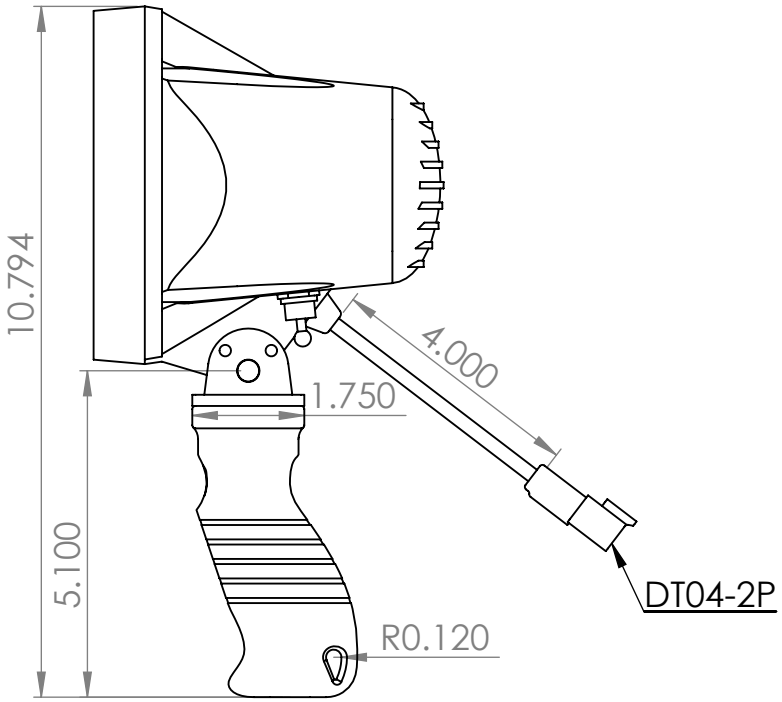

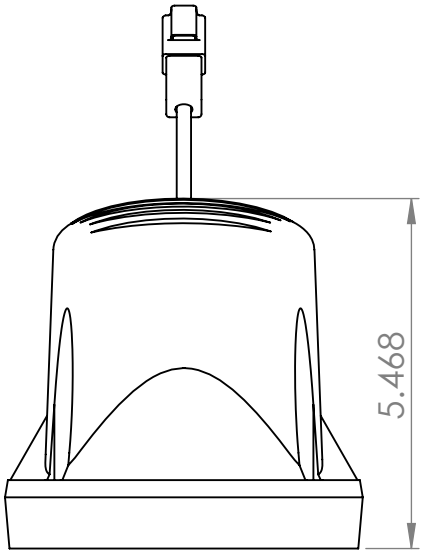

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

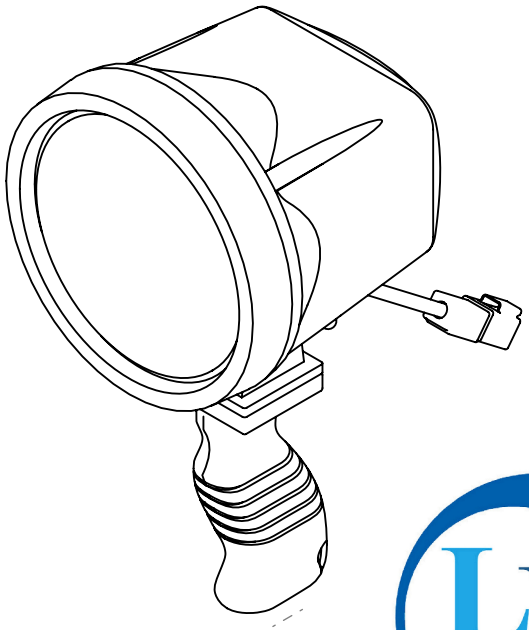

Removeable Red Hunting Lens for the HUL-18 and HUL-18-HID Handheld Spotlights - Adhesive

The operator removes the protective backing from the Mylar flood lens and applies it to the clean HUL-18/HUL-18-HID lens surface. The Mylar red lens can withstand the heat and with care, can be removed and re-applied at will as long as the operator keeps the adhesive backing clean. In reality, the operator is likely to either leave the red lens in place or use a new one. For this reason, we sell these HUL-18 lens covers in packs of 5 unit.
Finally, being made of Mylar, the red lens cover will protect the HUL-18 & HUL-18-HID glass lens from damage from stones and debris.
